THE SUNDAY TIMES BESTSELLER 'A mind-expanding tour of the world without leaving your paintbox. Every colour has a story, and here are some of the most alluring, alarming, and thought-provoking. Very hard painting the hallway magnolia after this inspiring primer.' Simon Garfield *The Secret Lives of Colour* tells the unusual stories of the 75 most fascinating shades, dyes and hues. From blonde to ginger, the brown that changed the way battles were fought to the white that protected against the plague, Picasso's blue period to the charcoal on the cave walls at Lascaux, acid yellow to kelly green, and from scarlet women to imperial purple, these surprising stories run like a bright thread throughout history. In this book Kassia St Clair has turned her lifelong obsession with colours and where they come from (whether Van Gogh's chrome yellow sunflowers or punk's fluorescent pink) into a unique study of human civilisation. Across fashion and politics, art and war, *The Secret Lives of Colour* tell the vivid story of our culture.

An experimental approach to the study and teaching of color is comprised of exercises in seeing color action and feeling color relatedness before arriving at color theory.

Brilliant distillations of the strategies of war—and the subtle social game of everyday life—by the

bestselling author of *The 48 Laws of Power* and *The Laws of Human Nature* Robert Greene's groundbreaking guides, *The 48 Laws of Power*, *The Art of Seduction*, and *Mastery*, espouse profound, timeless lessons from the events of history to help readers vanquish an enemy, ensnare an unsuspecting victim, or become the greatest in your field. In *The 33 Strategies of War*, Greene has crafted an important addition to this ruthless and unique series. Spanning world civilizations, synthesizing dozens of political, philosophical, and religious texts and thousands of years of violent conflict, *The 33 Strategies of War* is the I-Ching of conflict, the contemporary companion to Sun Tzu's *The Art of War*. Abundantly illustrated with examples from history, including the folly and genius of everyone from Napoleon to Margaret Thatcher, Shaka the Zulu to Lord Nelson, Hannibal to Ulysses S. Grant, as well as movie moguls, Samurai swordsmen, and diplomats, each of the thirty-three chapters outlines a strategy that will help you win life's wars. Learn the offensive strategies that require you to maintain the initiative and negotiate from a position of strength, or the defensive strategies designed to help you respond to dangerous situations and avoid unwinnable wars. The great warriors of battlefields and drawing rooms alike demonstrate prudence, agility, balance, and calm, and a keen understanding that the rational, resourceful, and intuitive always defeat the panicked, the uncreative, and the stupid. An indispensable book, *The 33 Strategies of War* provides all the psychological ammunition you need to overcome patterns of failure and forever gain the upper hand.

New York Times bestselling author Maureen Johnson weaves a delicate tale of murder and mystery in the first book of a striking new series, perfect for fans of Agatha Christie and E. Lockhart. Ellingham Academy is a famous private school in Vermont for the brightest thinkers, inventors, and artists. It was founded by Albert Ellingham, an early twentieth century tycoon, who wanted to make a wonderful place full of riddles, twisting pathways, and gardens. "A place," he said, "where learning is a game." Shortly after the school opened, his wife and daughter were kidnapped. The only real clue was a mocking riddle listing methods of murder, signed with the frightening pseudonym "Truly, Devious." It became one of the great unsolved crimes of American history. True-crime aficionado Stevie Bell is set to begin her first year at Ellingham Academy, and she has an ambitious plan: She will solve this cold case. That is, she will solve the case when she gets a grip on her demanding new school life and her housemates: the inventor, the novelist, the actor, the artist, and the jokester. But something strange is happening. Truly Devious makes a surprise return, and death revisits Ellingham Academy. The past has crawled out of its grave. Someone has gotten away with murder. The two interwoven mysteries of this first book in the Truly Devious series dovetail brilliantly, and Stevie Bell will continue her relentless quest for the murderers in books two and three.

Object Lessons is a series of short, beautifully designed books about the hidden lives of ordinary things. Every shelf is different and every bookshelf tells a different story. One bookshelf can creak with character in a bohemian coffee shop and another can groan with gravitas in the Library of Congress. Writer and historian Lydia Pyne finds bookshelves to be holders not just of books but of so many other things: values, vibes, and verbs that can be contained and displayed in the buildings and rooms of contemporary human existence. With a shrewd eye toward this particular moment in the history of books, Pyne takes the reader on a tour of the bookshelf that leads critically to this juncture: amid rumors of the death of book culture, why is the life of the bookshelf in full bloom? Object Lessons is published in partnership with an essay series in The Atlantic.
