No one knew until it was too late. They were going to put back the release date, but the suits decided all publicity was good publicity. ” I sat back. Better to think of it as a story. A fractured fairy tale. “ Jesus. So he ' s touchy, right? ” Alice ' s face was animated. She loved all the gossip, and I usually didn ' t spill. I laughed.

A great sequel to the first book "Access all areas". Lily and Tristan are both very complex characters, but you get pulled into the story in such a compulsive manner, it is a book you simply do not want to put down. A very well written and thought provoking book. A definite must and I hope book 3 will be along soon...

Sir Lenny Henry rang up the Office for National Statistics to confirm something he'd been thinking about for a long time. They told him that only 29.5% of the United Kingdom's population is made up of white, heterosexual, able-bodied men; so, he wonders, why do they still make up the vast majority of people we see in our media? Joining forces with the former Chair of the Royal Television Society's Diversity Committee Marcus Ryder, he draws on decades of experience to reveal why recent efforts to diversify media have been thus far ineffective, and why they are simply not enough. With wit, humour and unflinching gravitas they analyse the flaws of current diversity initiatives, point out the structural and financial imbalances working against the cause, and provide clear solutions to get the media industry back on track. Access All Areas is an urgent, actionable manifesto that will dramatically shift the debate around diversity and the media.

Over the period 1999-2005, choreographer and dancer Tess de Quincey and a team of international artists conducted a series of art-laboratories and performances in and around the Central Desert town of Alice Springs. These art-labs culminated in the 2005 performance of Dictionary of Atmospheres, staged during the Alice Desert Festival. Drawing upon practice-based research conducted while interning with de Quincey during the development and staging of Dictionary of Atmospheres, Anderson contemplates the way in which moments from the production illustrate the artist ' s approach to and articulation of place. Meeting Places offers meditation on the nature of experience as it manifests in serial site-specific art encounters in desert locations. Mary Elizabeth Anderson is an assistant professor in the Maggie Allesee Department of Theatre & Dance at Wayne State University. Her research explores dimensions of popular participation in performance, with particular focus on placemaking, teaching artistry and reflective practice.

security and trust. Because of the complexity and scale of deployment of emerging ICT systems based on web service and grid computing concepts, we also need to develop new, scalable, and more flexible foundational models of pervasive security enforcement across organizational borders and in situations where there is high uncertainty about the identity and trustworthiness of the participating networked entities. On the other hand, the increasingly complex set of building activities sharing different resources but managed with different policies calls for new and business-enabling models of trust between members of virtual organizations and communities that span the boundaries of physical enterprises and loosely structured groups of individuals. The papers presented in this volume address the challenges posed by "ambient intelligence space" as a future paradigm and the need for a set of concepts, tools and methodologies to enable the user's trust and confidence in the underlying computing infrastructure. This state-of-the-art volume presents selected papers from the 2nd International Workshop on Formal Aspects in Security and Trust, held in conjunction with the 18th IFIP World Computer Congress, August 2004, in Toulouse, France. The collection will be important not only for computer security experts and researchers but also for teachers and administrators interested in security methodologies and research.

This book looks at all of the ethical issues facing information and library professionals in one overarching, and practically-focused, text. As such, it is of great benefit to both practitioners and to LIS students. The focus of the book is two-fold: (1) It contains a detailed discussion of the issues that impact on the day-to-day practice of information workers in the 21st century; and (2) contains case studies discussing potential solutions to ethical problems faced. The book provides sections which work like flowcharts leading from ethical issues through decision points to proposed solutions based on the literature/case studies. This is a highly useful resource that provides appropriate access to potential solutions for day-to-day queries. Despite the coverage of ethical issues in books on copyright, freedom of information, public internet access, and data protection, this book fills the gap in drawing all of this information together, as one sourcebook. The book can be used for regular reference. Does not offer legal advice per se, but explains the various scenarios that have been utilised for different ethical problems in the workplace.

Last night, clothes began appearing in Alice Hightower's closet at sunset. She might find bell bottoms from the seventies or a beaded flapper's dress from the twenties, but they fit perfectly. She slips on the outfits and opens her balcony door to another place and time where extraordinary men fill her nights. CEO of a medical device company about to unveil a revolutionary heart bypass product, Alice escapes her challenging days to the adventures beyond her balcony door. How could her smoldering VP of sales, or her fascinating assistant compare to Tweedle Don and Tweedle Dan, twin doctors from the seventies, or the sixties rock group who scolds Alice for being late for their very important date. At forty-nine, after two divorces, relating to her male coworkers has been entirely too complicated. When industrial espionage threatens her company, Alice has to save the position that defines her, discover the truth of her fantastic travels and decide if the real men in her life might be more satisfying than those she enjoys by night.
