students. With a global imperative for increased doctoral completions, universities around the world are providing more generic support. This book represents collegial cross-fertilisation focussed on generic pedagogy, provided by contributors who are practitioners working and researching at the pan-disciplinary level which complements supervision. In the UK, funding for two weeks annual training in transferable skills for each doctoral scholarship recipient has caused an explosion of such teaching, which is now flourishing elsewhere too; for example,

endorsed by the Carnegie Initiative on the Doctorate in the USA and developed extensively in Australia. Generic doctoral support is expanding, yet is a relatively new kind of teaching, practised extensively only in the last decade and with its own ethical, practical and pedagogical complexities. These raise a number of questions: How is generic support funded and situated within institutions? Should some sessions be compulsory for doctoral students? Where do the boundaries lie between what can be taught generically or left to supervisors as discipline-

specific? To what extent is generic work pastoral? What are its main benefits? Its challenges? Its objectives? Over the last two decades supervision has been investigated and theorised as a teaching practice, a discussion this book extends to generic doctoral support. This edited book has contributions from a wide range of authors and includes short inset narratives from academic authorities, accumulatively enabling discussion of practice and the establishment of a benchmark for this growing topic.

Plants Handbook is an easy to use identification guide to the worlds flowering plants designed for both specialists and non-specialists and from beginner to expert. The book contains descriptions of all currently recognised flowering plant families, morphological notes for 6656 genera (all current genera for 398/413 families) and over 3000 images and illustrations. Flowering plants can be identified using the book to family and much of the world's generic diversity in four 'easy' steps. Some plants will be identified correctly quickly, whilst others may

require some retracing of steps and take a little more time. The advantage of this book is that it helps the user learn about the classification system and plant diversity during the identification process. This work was compiled and developed using the living, library and herbarium collections at the University of Aberdeen, Royal Botanic Gardens, Edinburgh and Royal Botanic Gardens, Kew.

the publication of the Common European Framework of Reference for Languages (CEFR) and updates the 2001 version. It owes much to the contributions of members of the language teaching profession across Europe and beyond. This volume contains: ► an explanation of the key aspects of the CEFR for teaching and learning; ► a complete set of updated CEFR descriptors that replaces the 2001 set with: - modality-inclusive and gender-neutral descriptors; - added detail on listening and reading; - a new Pre-A1 level, plus enriched description at A1 and C levels; - a

and woody vines found in the state. The book is organized by plant types, which are divided into gymnosperms and angiosperms. For each species treated, the authors include both scientific and common names, a brief description, information on flowering and fruiting seasons, and distribution patterns. Photographs illustrate more than ninety five percent of species, and the text is fully indexed by families and genera, scientific names, and common names. A glossary is keyed to photographs in the text to illustrate definitions. In their introduction, Wofford and Chester provide

A Quick Guide to Human Resource Testing is a quick reference guide for human resource (HR) practitioners who use or plan to use assessment instruments in any context. It includes explanations, tips, case studies and suggestions to help practitioners get the most out of their HR testing. Those in charge of recruiting and selecting new staff face a decision-making process that needs to be responsible in its implementation and to produce a positive and wide-

ranging outcome. The cost of a wrong selection decision has been estimated to be anywhere between one and a half times and five times the salary of the job in question. Studies have shown that appropriate assessment tools enhance the chances of making good selection and recruitment decisions.

Testing is also important to the HR practitioner in a variety of other contexts, including team building, change management and ongoing organisational needs. Good practice and appropriate use of tests are as vital to these areas as they are in the selection and recruitment of staff.
