legacy of that school system, and the full text of the Commission's 94 recommendations for action to address that legacy. This report lays bare a part of Canada's history that until recently was little-known to

most non-Aboriginal Canadians. The Commission discusses the logic of the colonization of Canada's territories, and why and how policy and practice developed to end the existence of distinct

where they were forbidden to speak their language, required to discard their clothing in favour of institutional wear, given inadequate food, housed in inferior and fire-prone buildings, required to work

have been compensated financially by the Government of Canada for their experiences in residential schools, but the legacy of this experience is ongoing today. This report explains the links to high

The Vision for Water and

Read Online Adaptive Solutions Canada

Nature is the "environment and ecosystems" component of the World Water Vision exercise of the World Water Council. It represents the first meaningful attempt to fully integrate environment issues into the development

Read Online Adaptive Solutions Canada

of a comprehensive strategy for water resource management at the global level. The vision was developed by IUCN through an extensive consultation effort based on three thematic workshops on

freshwater ecosystem
management and social,
economic and environmental
security, respectively.
Instead of considering the
environment as one of many
water management sub-
sectors, IUCN's

This book is the most

account of the popular
numerical methods for

solving boundary value problems in ordinary differential equations. It aims at a thorough understanding of the field by giving an in-depth analysis of the numerical methods by using decoupling

theoretical coverage of the subject matter, not available elsewhere in one volume. Many problems, arising in a wide variety of application areas, give rise to mathematical models which form boundary value problems
