This book gathers the proceedings of the 1st International Conference on Engineering, Applied Sciences and System Modeling (ICEASSM), a four-day event (18th–21st April 2017) held in Accra, Ghana. It focuses on research work promoting a better understanding of engineering problems through applied sciences and modeling, and on solutions generated in an African setting but with relevance to the world as a whole. The book provides a holistic overview of challenges facing Africa, and addresses various areas from research and development perspectives. Presenting contributions by scientists, engineers and experts hailing from a host of international institutions, the book offers original approaches and technological solutions to help solve real-world problems through research and knowledge sharing. Further, it explores promising opportunities for collaborative research on issues of scientific, economic and social development, making it of interest to researchers, scientists and practitioners looking to conduct research in disciplines such as water supply, control, civil engineering, statistical modeling, renewable energy and sustainable urban development.

This Technical Assistance Report presents an assessment of public investment management in Botswana. Botswana's public investment has been consistently high for the past 25 years coupled with prudent fiscal policy and moderate debt at about 10 percent of GDP. Relatively high public investment spending has contributed to steady accumulation of capital stock—almost three times more per capita than peers and emerging market averages. More than 60 percent of investment is spent on economic affairs. While Botswana performed better than peer and emerging market averages up to 2010, more recently, indicators of infrastructure quality suggest significant bottlenecks, particularly in access to electricity supply and railways.

For a growing number of countries in Africa the discovery and exploitation of natural resources is a great opportunity, but one accompanied by considerable risks. This book presents research on how to better manage the revenues and opportunities associated with natural resources.

Spon's Asia Pacific Construction Costs Handbook includes construction cost data for twenty countries. This new edition has been extended to include Pakistan and Cambodia. Australia, UK and America are also included, to facilitate comparison with construction costs elsewhere. standards labour and materials cost data measured rates for a range of standard construction work items approximate estimating costs per unit area for a range of building types price index data and exchange rate movements against £ sterling, \$US and Japanese Yen. The book also includes a Comparative Data section to facilitate country-to-country comparisons. Figures from the national sections are grouped in tables according to national indicators, construction output, input costs and costs per square metre for factories, offices, warehouses, hospitals, schools, theatres, sports halls, hotels and housing. This unique handbook will be an essential reference for all construction professionals involved in work outside their own country and for all developers or multinational companies assessing comparative development costs.

Most people are rich for a single day in their lives: the day they retire and receive their retirement savings. This moment is more critical than many people realise – it marks the change from saving for retirement to drawing an income from savings that will ideally sustain them until they die. All too often, pensioners end up struggling financially because they make the wrong decisions after they retire. It is crucial for retirees to apply themselves to securing a sustainable income. This book provides a comprehensive overview of the vital issues that impact on retirement, such as taxation, investments, healthcare, estate planning and where to live when retired. It also identifies warning signs to look out for in order to avoid financial troubles. Written in clear and straightforward language by well-known journalist Bruce Cameron and respected financial planner Wouter Fourie, this is the ultimate guide to help you achieve a secure and successful retirement.

World Development Indicators 2016 provides a compilation of relevant, high-quality, and internationally comparable statistics about global development and the fight against poverty. It is intended to help policymakers, students, analysts, professors, program managers, and citizens find and use data related to all aspects of development, including those that help monitor progress toward the World Bank Group's two goals of ending poverty and promoting shared prosperity. Six themes are used to organize indicators—world view, people, environment, economy, states and markets, and global links. WDI 2016 includes:

- A selection of the most popular indicators across 214 economies and 14 country groups organized into six WDI themes
- A new section on the Sustainable Development Goals (SDGs) has replaced the one on Millennium Development Goals (MDGs).
- The SDG section covers all 17 goals, and important targets to achieve these goals. Each goal has been presented in a maximum 2-page spread with selected indicators to explain the targets.
- Each of the remaining sections includes an introduction, a map, a table of the most relevant and popular indicators for that theme together with a discussion of indicator compilation methodology.
- A user guide describing resources available online and on mobile apps. Download the WDI DataFinder Mobile App and other Data Apps at data.worldbank.org/apps. WDI DataFinder is a mobile app for browsing the current WDI database on smartphones and tablets, using iOS and Android, available in four languages: English, French, Spanish, and Chinese. Use the app to:

- Browse data using the structure of the WDI
- Visually compare countries and indicators
- Create, edit, and save customized tables, charts, and maps
- Share what you create on Twitter, Facebook, and via email
