Automotive petrol engines. BMW is well known for its history of inline-six (straight-six) engines, a layout it continues to use to this day despite most other manufacturers switching to a V6 layout. The more common inline-four and V8 layouts are also produced by BMW, and at times the company has produced inline-three, V10 and V12 engines.. Prototype

not easy, but is a lot easier to do, when somebody has done it before, and this is why I have put this info together from my own experience and info gathered from other people.

*BMW R100 - AircraftGraphix.com*

"Airhead" is slang for a BMW boxer (two-cylinders, opposed) air-cooled motorcycle equipped with a tunnel engine, manufactured between December 1969 (the beginning of the /5 series) and the end of production of this style of engine in 1995-1996. "Airhead" does not include other opposed cylinder twins,
