Subjects include Fundamentals of Wood/Epoxy Composite Construction, Core Boatbuilding Techniques, First Production Steps, Hull Construction Methods, and Interior and Deck Construction.

Content analysis is one of the most important but complex research methodologies in the social sciences. In this thoroughly updated Second Edition of The Content Analysis Guidebook, author Kimberly Neuendorf provides an accessible core text for upper-level undergraduates and graduate students across the social sciences. Comprising step-by-step instructions and practical advice, this text unravels the complicated aspects of content analysis.

"Theo's Travels" is the true story of a small boy and his 12 year journey around the world in a 1962 English double decker bus.Together with his parents,"The Sprockets", as they became known to the world, the family put on over 2000 circus comedy shows in more than 40 different countries across 5 continents.A road trip with almost no end, it features original photos and the world as seen through the eyes of a child.

Little Lucy loves to lick her lips a lot. In fact, she can't stop licking her lips! But Lucy is about to find out there are very serious and ridiculous consequences to lip licking in cold weather. Lucy's hilarious cautionary tale will have you in stitches as she navigates the rather shocking effects of excessive lip licking. You will never go outside without your chap stick ever again.

Groundbreaking new research shows that by grabbing hold of the three-step "loop" all habits form in our brains—cue, routine, reward—we can change them, giving us the power to take control over our lives. "We are what we repeatedly do," said Aristotle. "Excellence, then, is not an act, but a habit." On the most basic level, a habit is a simple neurological loop: there is a cue (my mouth feels gross), a routine (hello, Crest), and a reward (ahhh, minty fresh). Understanding this loop is the key to exercising regularly or becoming more productive at work or tapping into reserves of creativity. Marketers, too, are learning how to exploit these loops to boost sales; CEOs and coaches are using them to change how employees work and athletes compete. As this book shows, tweaking even one habit, as long as it's the right one, can have staggering effects. In The Power of Habit, award-winning New York Times business reporter Charles Duhigg takes readers inside labs where brain scans record habits as they flourish and die; classrooms in which students learn to boost their willpower; and boardrooms where executives dream up products that tug on our deepest habitual urges. Full of compelling narratives that will appeal to fans of Michael Lewis, Jonah Lehrer, and Chip and Dan Heath, The Power of Habit contains an exhilarating argument: our most basic actions are not the product of well-considered decision making, but of habits we often do not realize exist. By harnessing this new science, we can transform our lives.

Offers tips on planning an inexpensive wedding, including advice on gown deposits, ceremony and reception sites, and selecting invitations

This e-book offers an insightful look into the way today's students think about and use technology in their academic and social lives. It will help institutional leaders help their students to become more successful and satisfied.

The autobiography of Helen Keller, who lost both sight and hearing by illness at nineteen months, and became a famous author and lecturer.

“ A hilarious family tale ” about a modern-day mother ' s lifestyle crisis—and her outlandish attempts to get her family back (Woman ' s Day). Lydia Modine is sixty-one and about to come undone. Her three grown-up children have flown the coop. She hasn ' t seen them together in more than a year, and now her ex-husband is about to marry a woman half his age. And the insults keep coming: Lydia is stuck on a book she ' s writing about Detroit ' s car industry, which uncannily parallels her own life—out with the old model, in with the new. She ' s poured her soul into her family, only to be abandoned in the City of Dream Machines. But then a twist of fate introduces her to Norm, an eco-car fanatic out to remake her and the world. A “ smart and funny ” novel that ' s sure to appeal to anyone who has longed for an alternate life, Drives Like a Dream confirms that sometimes when you set out for a spin, the twists and turns can be perfectly rewarding—and right (Chicago Tribune). “ A beautiful novel. ” —The Washington Post

For thirty years, Peter Singer's Practical Ethics has been the classic introduction to applied ethics. For this third edition, the author has revised and updated all the chapters and added a new chapter addressing climate change, one of the most important ethical challenges of our generation. Some of the questions discussed in this book concern our daily lives. Is it ethical to buy luxuries when others do not have enough to eat? Should we buy meat from intensively reared animals? Am I doing something wrong if my carbon footprint is above the global average? Other questions confront us as concerned citizens: equality and discrimination on the grounds of race or sex; abortion, the use of embryos for research and euthanasia; political violence and terrorism; and the preservation of our planet's environment. This book's lucid style and provocative arguments make it an ideal text for university courses and for anyone willing to think about how she or he ought to live.
