For the aficionado of farm equipment, or the scion of an old farming family nostalgic for the old days, or the grown-up boy who still loves a classic piece of old-time machinery, the vintage tractor can be a thrilling find like no other. This book tells dozens of stories of such discoveries, of the treasured old tractor parked in a shed since 1927, of the pristine model unearthed at an estate sale, of the broken-down old beauty stashed in a barn where generations of children have made their secret hideaways. These are the classic tractors that are often as hard to find as a needle in a haystack—but far more fun to discover, as all of these delightful stories make abundantly clear.

This is one of two volumes by the same editors that explore historical, philosophical, and cultural perspectives on literacy in China. This volume focuses on English literacy in China, while the other volume is on Chinese literacy. In modern day China, English has enjoyed an increasingly important status in education, but not without challenges. The essays in this volume provide a comprehensive, cross-disciplinary look at changes in English literacy practices and literacy instruction in China from the first English school in the 19th century to recent curriculum reform efforts to modernize English instruction from basic education through higher education. Together, the essays address a wide array of topics, including early childhood English education, uses of information technology to teach English, and teaching English to Chinese minority students. This work is essential reading for those who want to expand their understanding of English literacy education in China.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

In the early seventies, when Led Zeppelin and Black Sabbath ruled the world, Steve “Lips” Kudlow and Robb Reiner, two young Jewish boys from the northern suburbs of Toronto, vowed to rock together forever. A decade later, their band Anvil released one of the heaviest records in music history, Metal on Metal, which influenced a whole musical generation, including the world-dominating bands Metallica, Slayer, and Anthrax. Yet while these bands went on to sell millions of records, Anvil slipped straight into obscurity. Was it too much sex and drugs and not enough rock ‘n’ roll? Was it the menagerie of pets that accompanied them on tour? Their uncanny knack for setting themselves on fire whenever a record company executive was watching? Now, almost thirty years later, like a real-life Spinal Tap, these unlikely musical heroes are still rocking, and still chasing their dream. Written in their own words, Anvil: The Story of Anvil charts the rise, fall, and eventual triumph of two men whose indestructible friendship, talent, and determination took them on a unique journey in the world of rock. A bittersweet and frequently hilarious hymn to the human spirit, played loud in power chords, it is a story of true brotherly love, living the dream, and never giving up. Praise for the film documentary Anvil: The Story of Anvil: Page 12
