Comic actor TONY ROBINSON writes: Sometimes, the best medicine is the chance to hold the hand of the person we love. Depriving our elderly of that is cruel beyond belief.

Bureaucracy, in the Indian context.

An unorthodox and maverick administrator, the author worked in top policy positions, but the system rejected the reforms that he advocated. In his career he followed the economic philosophy of ‘ socialism for the poor and free market for the rich ’ . However, the political and administrative system in India seemed to believe in ‘ indifference to the poor and control over the rich to facilitate rent seeking ’ . The book is full of anecdotes ranging from how the author resisted political corruption that led to the Prime Minister ’ s annoyance to a situation when the author himself ‘ bribed ’ the Chief Minister to scrap oppressive laws against tribal women. As Joint Secretary, Minorities Commission, the author exposed the

communal bias of the district administration in handling riots in Meerut; he was punished for bringing to light the killing of innocent Muslim women and children by the police. When Bihar became a ' failed state ' during the Lalu Prasad Yadav era of 1990–2005, the author did not hesitate in rebuking the Chief Secretary who was his senior in service, and accused IAS officials in Bihar of behaving like English-speaking politicians. Despite their high integrity, hard work and competence, IAS officials do not exercise sufficient control over the field staff who collude with the junior staff in reporting false figures on hunger deaths, malnutrition and usage of toilets, leading to erosion of accountability. Not only do many welfare programmes such as NREGA, ICDS and PDS have design flaws, governance in India at the state and district levels is also quite weak, manifesting itself in poor service delivery, uncaring administration, corruption, and uncoordinated and wasteful public expenditure. Analysing the present Indian situation, the book suggests policy changes in all cross-cutting systemic issues such as the role of politicians, tenure, size and nature of Indian bureaucracy, accountability, monitoring of programmes and civil service reforms, which will transform individual competencies of IAS officers into better collective outcomes.

Whatever its faults, the Indian bureaucracy cannot be accused of bias when it comes to confounding those who have to deal with it. Veteran insiders who return to it with their petitions after retirement are as clueless about how it functions as freshly minted applicants. Outsiders in any case have little knowledge of who is responsible for what and why or how to navigate that critical proposal through the treacherous shoals of the secretariat. At the top of the heap is the fast-tracked elite civil servant, who belongs to a

group of generalist and specialized services selected through a competitive examination. The aura of the Indian Administrative Service has remained intact over the years. Lack of awe, bordering on civilized disrespect, is a most effective learning tool. In this humorous, practical book, T.R. Raghunandan aims to deconstruct the structure of the bureaucracy and how it functions, for the understanding of the common person and replaces the anxiety that people feel when they step into a government office with a healthy dollop of irreverence.

Is the Indian Administrative Service (IAS) still the most appropriate institution to govern twenty-first-century India? Should a cadre of generalists head organizations as complex and diverse as industrial units; museums and rural development boards? If it had to be replaced; what is the best alternative? Drawing on his experience of thirty-six years in the IAS; Bhaskar Ghose addresses these and other major questions regarding the role; relevance and effectiveness of India ' s long-established but often controversial system of state administration in *The Service of the State*. Ghose argues forcefully that the IAS is still the best option and one moreover that substantially fulfils its functions—and fulfils them well. Though its once sterling reputation has been tarnished by allegations of corruption; political subservience and declining standards of efficiency; there are still sufficient numbers of dedicated public servants. These administrators; spanning diverse social backgrounds; seniorities and regional profiles; draw on established traditions of duty and of cooperation within the service to deliver—to the best of their ability and often in the face of considerable odds—the goods of development. This reflective and luminous memoir is not only a portrait of a lifetime ' s service to the state; it is also a timely and persuasive argument for a system
