camera, providing information about how to accomplish things with the camera as well as when and why to use certain features. The book explains topics such as autofocus, manual focus, depth of field, aperture priority, shutter priority, HDR (High Dynamic Range) photography, white balance, ISO, and macro photography, in the context of getting great results with Canon's highly pocketable camera. The book gives details about how to take advantage of the camera's varied array of "Scene" and "Creative Filters" shooting settings. The guide's more than 300 photographs, almost all in full color, illustrate the camera's controls and menus and include examples of the photographs that can be taken using the S110's

many options, including the Creative Filters settings, which alter the color processing and other aspects of images; menu options such as i-Contrast and digital zoom; and the camera's strong features for continuous shooting. In addition, the book goes beyond the realm of everyday photography with introductions to topics such as infrared photography, street photography, and using the Raw format, which permits a wide range of adjustments to images after they have been captured. The book also explains the video recording abilities of the PowerShot S110, which can record high-definition (HD) video with stereo sound and can take "Super Slow Motion" movies that slow down action by a factor of eight. In three

appendices, the book discusses accessories, including cases, a filter adapter, and external flash units; contains a list of useful web sites and other resources; and includes helpful "quick tips" that give particular insights into how to take best advantage of the camera's features.

From the Bob Tascione's web site: "The Tascione Pocket Watch Repair Course (Great for Wrist Watches Too!) consists of 5 info. packed videos and the course manual "Pocket Watches and Why They Work". This course was designed for the person who would like to learn the dying art of mechanical watch repair but doesn't have the time or funds to attend a traditional

watch repair school and has discovered how difficult it is to learn from books and diagrams alone. The course manual describes, through the use of many detailed diagrams and simple to understand text, how and why a watch works. The first 3 videos and the manual have been linked through the use of an on screen timer. When something is being explained in the text that might be a little difficult to understand, such as escapement action, I give you the exact point to fast forward to on a video to see exactly what I'm talking about. This system makes sometimes difficult to understand topics unbelievably simple to learn. Everything you'll need to know to do cleaning and general repairs on a watch with a minimum of tools is

in this course. You'll learn in a few hours tons of hints, tips and tricks that took me years to learn through trial and error. Not only will you learn what to do but even more importantly I'll show you what not to do. The manual even has a chapter called "Business Tock" for those of you who might want to take advantage of the lucrative watch repair service market. This chapter shows you correct pricing techniques and work load limits. You'll find tons of great close-up shots throughout all 5 videos demonstrating everything from removing the movement from the case to the correct use of a staking set for many types of operations. Change mainsprings, cannon pinions, balance staffs,

hairsprings, and much much more. I also tell you where to go for parts, tools, and certain specialized services. One mistake can easily cost far more than this course, and most of what I teach I learned through hard earned mistakes because I had no one to show me the few simple techniques that I demonstrate in these videos. So if you think you might enjoy watch repair then please consider this course."
