Service Manuals | Carrier Air Conditioner  
 Carrier selected R-32 refrigerant, which has a low global warming potential (GWP) of 675, for use in commercial scroll chiller ranges. R-32 has a GWP that is two thirds less than the GWP of the current R-410A version and this change, combined with a significant system refrigerant charge reduction - up to 30% - allows for an exceptional 80% reduction in direct greenhouse gas emissions.

 Carrier Inverter Aircon Window Type gives you at least 40% real inverter savings \* Based on test conducted at CCAC's environmental laboratory using 1.5 hp, at 18 degrees, high fan speed, swing setting, 8 hours of night time use with uncontrolled ambient temperature. Get even more savings because Carrier Inverter Aircon Window Type

A case can be made that the extensive use of air conditioning use in the United States is an excess and poor example to the rest of the world that makes a mockery of the current ideology of energy sustainability including concerns about prevention of global warming. Extension of these wasteful practices to emerging economies (like India) is easily shown to be unsustainable. As with other recalcitrant problems such as over-reliance on cars and poor personal health and dietary habits the source of the problem is found individual moral choices that are championed as individual freedoms but actually representing degenerate morality which yields more benefit to corporations and big government. The Buddhist ethic provides one path into the heart of human choices illuminating as it does the "incorrect thinking" that underlies bad choices including those that most people think are based on common sense and scientific expertise. This book applies this idea to the matter of air conditioning, using Thailand and like Southeast Asian settings as an example. It claims that emerging western interest in "mindfulness" can be leveraged to introduce new thinking on personal energy use that will go much further to create true sustainability than programs based on "harnessing" geophysical technologies such as solar and wind.

\* A broad range of disciplines--energy conservation and air quality issues, construction and design, and the manufacture of temperature-sensitive products and materials--is covered in this comprehensive handbook \* Provide essential, up-to-date HVAC data, codes, standards, and guidelines, all conveniently located in one volume \* A definitive reference source on the design, selection and operation of A/C and refrigeration systems

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.

The Third Edition of ANSI/ACCA Manual D is the Air Conditioning Contractors of America procedure for sizing residential duct systems. This procedure uses Manual J (ANSI/ACCA, Eighth Edition) heating and cooling loads to determine space air delivery requirements. This procedure matches duct system resistance (pressure drop) to blower performance (as defined by manufacturer's blower performance tables). This assures that appropriate airflow is delivered to all rooms and spaces; and that system airflow is compatible with the operating range of primary equipment. The capabilities and sensitivities of this procedure are compatible with single-zone systems, and multi-zone (air zoned) systems. The primary equipment can have a multi-speed blower (PSC motor), or a variable-speed blower (ECM or constant torque motor, or a true variable speed motor). Edition Three, Version 2.50 of Manual D (D3) specifically identifies normative requirements, and specifically identifies related informative material.
