Principles of Accounts is a major new textbook which provides in-depth coverage of all aspects of the CXC Principles of Accounts and Book Keeping syllabuses at basic and general levels. It is also an invaluable resource book for students preparing for advanced level accounting and for those taking accounting examinations with other examining bodies. Emphasis is placed on a clear, thorough, step-by-step presentation suitable for both classroom use and self study. Worked examples of typical exam-style questions reinforce the text and illustrate the layout of different kinds of accounts. Numerous exercises in each chapter give students plenty of practice on questions based on CXC requirements. Selected answers are given at the back of the book.

The book has been specifically designed to include all topics covered in first courses in accounting in higher education. In addition, it caters for the curriculum of professional bodies which examine students for entry into business and accounting careers.

Book-Keeping Made Simple, Revised Edition covers all the basic principles of elementary book-keeping. The book describes the requirements and process of starting a business, including ledger accounts, classifying the assets, the balance sheet, buying assets, and transactions involving liabilities. The text also discusses the double-entry systems; subsidiary books and original documents; the reduction of work-on day book entries; and the three-column cash books. The journal proper, the Imprest system, the trial balance and its limitations, and the bank reconciliation statements are also considered. The book further tackles analytical or columnar day books; the principle and layout of the cash book; the adjustments in final accounts; and partnership accounts. The text also discusses departmental-, manufacturing-, and control accounts and accounts of limited companies; the amalgamation of businesses; the purchase of a business; and the bills for exchange. Students of book-keeping will find the book invaluable.
