The COVID-19 pandemic changed world dynamics, working scenarios, as well as professional and emotional dimensions. The virus has emerged as a significant threat for the continuity of business. Keeping the gravity of the problem in mind, companies must understand the need for change and must now update their strategy to account for pandemics. The next pandemic may be more severe than the current one, meaning that organizations need to devise mechanisms and business models to fight with these situations and maintain business continuity. They should not only look forward to saving plants, machinery and infrastructure, but also concentrate on employee welfare, customer engagement and satisfaction during this crisis time. The book will not only present the evidence of various effective solutions to run a business in the time of a pandemic, but also put forward the new models and practices of business being followed by people at the time of crisis. It aims to create a bridge between existing business models and proposed business solutions, focusing on existing theories and most importantly case studies from recent happenings. This rich collection of chapters will provide insights regarding the business challenges, opportunities and practices during pandemic situations like COVID-19, making it particularly valuable to researchers, academics and students in the fields of strategic management, leadership and disaster management.

Improving documentation is no easy task CDI professionals have never had one easy-to-read, inclusive reference to help them implement a CDI program, understand the fundamentals of ICD-9-CM coding, query physicians, and encourage interdepartmental communication. In theory, physicians should document their entire thought process, including ruling conditions in and out. But it's not that simple, and in light of MS-DRGs, it requires significant physician education and retraining. You need a blueprint for success.. Your blueprint has arrived! At last, here is a guide for CDI specialists. The Clinical Documentation Improvement Specialist's Handbook is your essential partner for creating a CDI program, staffing your program, querying physicians, and understanding how documentation affects code selection and data quality As a CDI specialist you need answers now In light of Medicare Severity DRGs (MS-DRG), detailed documentation and accurate capture of complications and comorbidities (CCs) has made the CDI specialist's role more important and more demanding than ever. This handbook will enhance your ability to gather the right information the first time--and every time Author Colleen Garry, RN, BS, has compiled case studies that document best practices and reference several different CDI models so that you can select the one that's right for your hospital's CDI success. In addition, you'll be privy to an executive summary of HCPro's exclusive CDI survey that solicited more than 800 responses. Learn how other hospitals are handling CDI and choosing the model that works best for them. \* work with physicians to obtain detailed, appropriate documentation \* maintain compliance when performing physician queries \* convey return on investment for a CDI program Customizable CD-ROM included Your copy of The Clinical Documentation Improvement Specialist's Handbook includes a CD-ROM loaded with all of the working tools you'll find in the book. Among them

Coding and Documentation Compliance for the ICD and DSM provides professionals, professors, and students with a logical and practical way of understanding a difficult topic in healthcare for the clinician: coding. Established professionals will find the tools they need to comply with the ICD series, HIPAA, and integrated care models. Professors and students will appreciate having a systemized, standardized approach to teaching and learning the more complex aspects of ICD compliance. The interplay between the ICD and DSM manuals is also explicated in clear terms.
