On the following video I'm showing how you can create DataSnap REST Server in Delphi, expose server methods and call them from an Android application. The video shows all the steps to create the server and the Android application. This is a short recap of the video. In order to have other platforms connecting and interacting with your DataSnap Server you need to enable the REST Interface, and for mobile platforms you can use the DataSnap Connectors that generate proxy classes for Android, ...

## ~~Datasnap Server~~

Once the data module generates a Datasnap connection, it creates a DBXConnection that establishes a tunnel between the DataSnap server and the client. Closing the TSQLConnection also closes the DBXConnection and breaks the tunnel. This tunnel will not be re-established if you open a connection again.

## ~~Connecting the Client to DataSnap Server - RAD Studio~~

I wrote an Android application that uses DataSnap with Mobile connectors to communicate with a delphi server. The application works without problems if imposed as a target platform Android-10 (ver. 2.3.3), Instead, if I get over this version does not

# Access Free Connecting Android With Delphi

work anymore, While debugging, I think I saw an exception about a null pointer inside the Java code generated by delphi.

~~Connecting Android apps to  
C++ Builder DataSnap Server~~  
DataSnap is a distributed  
computing technology available  
in RAD Studio. The RAD Studio XE  
release greatly increases the  
cross-platform and cross-  
language reach of DataSnap,  
particularly for REST  
implementations.. The DataSnap  
dispatcher handles all the client-  
based communication and  
marshalling automatically, so  
developers can usually forget  
about the communication and  
marshalling mechanics ...
