Book Description: Latest in Edelman's series exploring the role of symbols in political life, this volume examines the powerful social control that is exercised, largely unconsciously, through the manipulation of symbolism used in constructing the political spectacle. Defining the social construction constituted by news reporting a "political spectacle," Edelman argues that the actors in the spectacle get caught up in it and are avidly taken in by it.

Politics as spectacle is the cause that a crazy Marxist with a pipe and a ski mask marches around a nation (Mexico) with supporters who know nothing about the issues in discussion. Summing up, Edelman has written a very good argument about how politics is the construction of a big spectacle in which every actor plays its role.

The spectacle is a central notion in the Situationist theory, developed by Guy Debord in his 1967 book, The Society of the Spectacle. In the general sense, the spectacle refers to "the autocratic reign of the market economy which had acceded to an irresponsible sovereignty, and the totality of new techniques of government which accompanied this reign." It also exists in its limited sense, where spectacle means the mass media, which are "its most glaring superficial manifestation." Debord said th

Thanks to the ready availability of political news today, informed citizens can protect and promote their own interests and the public interest more effectively. Or can they? Murray Edelman argues against this conventional interpretation of politics, one that takes for granted that we live in a world of facts and that people react rationally to the facts they know. In doing so, he explores in detail the ways in which the conspicuous aspects of the political scene are interpretations that systematically buttress established inequalities and interpretations already dominant political ideologies.

Murray Edelman holds a unique and distinguished position in American political science. For decades one of the few serious scholars to question dominant rational-choice interpretations of politics, Edelman looked instead to the powerful influence of signs, spectacles, and symbols-of culture-on political behavior and political institutions. His first, now classic, book, The Symbolic Uses of Politics, created paths of inquiry in political science, communication studies, and sociology that are still being explored today. In this book, Edelman continues his quest to understand the influence of perception on the political process by turning to the role of art. He argues that political ideas, language, and actions cannot help but be based upon the images and narratives we take from literature, paintings, film, television, and other genres. Edelman believes art provides us with models, scenarios, narratives, and images we draw upon in order to make sense of political events, and he explores the different ways art can shape political perceptions and actions to both promote and inhibit diversity and democracy. "Elegantly written. . . . He brilliantly contends that art helps create the images from which opinion-molders and citizens construct the social realities of politics."-Choice "It is perhaps the freshness with which he puts his case that is what makes From Art to Politics, as well as his other works, so challenging and invigorating."-Philip Abbott, Review of Politics

Most Muslim-majority countries have legal systems that enshrine both Islam and liberal rights. While not necessarily at odds, these dual commitments nonetheless provide legal and symbolic resources for activists to advance contending visions for their states and societies. Using the case study of Malaysia, Constituting Religion examines how these legal arrangements enable litigation and feed the construction of a 'rights-versus-rites binary' in law, politics, and the popular imagination. By drawing on extensive primary source material and tracing controversial cases from the court of law to the court of public opinion, this study theorizes the 'judicialization of religion' and the radiating effects of courts on popular legal and religious consciousness. The book documents how legal institutions catalyze ideological struggles, which stand to redefine the nation and its politics. Probing the links between legal pluralism, social movements, secularism, and political Islamism, Constituting Religion sheds new light on the confluence of law, religion, politics, and society. This book is about how people in power use language to generate and perpetuate misunderstandings.

Politics as Symbolic Action: Mass Arousal and Quiescence deals with the dynamics of development of political threats related to political behavior. The book discusses the conditions under which the dynamics related to political behavior are the prior causes of political arousal, violence, and quiescence. The text examines the influence of governmental activity on people's beliefs and perceptions-how non-empirical cognitions become the resistant basis of change. The text also examines how the individual phenomenon and the group phenomenon become linked through symbol formation and myths. The book discusses emotion as a catalyst of political ritual and political violence as inferred from Theodore Sarbin's role theory. The use of metaphors, language forms, and mass tensions can all be social-psychological and political processes that can lead to political arousal or quiescence. The book also explains major violent disturbances as having patterns reflective of organization, disorganization, or by leadership example; the book notes the popular notion that the organization or the leader's direction starts or worsens the violence as very simplistic. The book then proposes that political perceptions and beliefs are changeable and that phenomenological perceptions of specific groups of people can identify which political behavior are systematic. The text is suitable for political analysts, political scientists, sociologists, and educators involved in group psychology and analyses.

To many, the term "campaign ethics" is an oxymoron. Questionable campaign conduct occurs at many levels, from national presidential elections to local delegate contests. Campaign ethics goes beyond mere "ethical dilemmas," or trying to decide whether or not a particular act is above board. The chapters in this volume examine the broad questions of ethics in campaigns from the perspective of those actors that play critical roles in them, as well as the scholars who study them. The contributors-who include leading academics, as well as practitioners from the world of campaigning and campaign reform-outline, assess, and critique the role and responsibilities of candidates, citizens, organized interest groups, political parties, professional campaign consultants, and the media, in insuring ethical campaigns. Contributors include: Robert E. Denton (Virginia Tech University), David A. Dulio (Oakland University), Brad Rourke (Institute for Global Ethics), Robin Kolodny (Temple University), L. Dale Lawton (Institute for Global Ethics), L. Sandy Maisel (Colby College), Larry Makinson (Center for Responsive Politics), Stephen K. Medvic (Franklin & Marshall College), Dale E.
