This book examines the design and build (D & B) method of procurement in the construction industry: its strengths, weaknesses and idiosyncrasies. Crucially, case studies of D & B projects on which the author has worked are included. The book begins by looking at the reasons for the increasing interest in D it then examines the basic components and principles of D & B, covering such issues as what is a D & B contract, the level and scope of liabilities, hybrids - what do they really mean and how many of them are

Best practice tendering for design and build projects is based on the findings of an Engineering and Physical Sciences Research Council (EPSRC) funded project. It reports on the factual experiences of those construction practitioners involved in Design and Build procurement and presents practical tools for the application of best practice tendering. This book provides a comprehensive guide for consultants and practitioners involved in the procurement process. It may also be of value to undergraduate and postgraduate students studying construction

The Joint Contracts Tribunal issued a new Design and Build Form in 2005, a successor to the JCT Standard Form of Building Contract with Contractor's Design. It looks substantially different from its predecessor and it is different in structure and often in its wording. This major new edition of David Chappell's well regarded book has been substantially revised to take account of the new contract terms and different structure. It also considers the standard novation agreements from the CIC and City of London Law Society and
