~~Book Review: HARVEST OF TIME (DOCTOR WHO) — STARBURST Magazine~~

Doctor Who: Harvest of Time is a novel about the third Doctor, played by Jon Pertwee between 1970 and 1974. Now, I'll admit it from the get-go – I'm not a dedicated fan of the TV show. I like it quite a lot, but I haven't seen a single episode of the old series and I have watched less than two seasons of the new.

One of science fiction's most acclaimed authors delivers a spectacular original novel in the Doctor Who universe featuring the Third Doctor, as played by Jon Pertwee.

This New York Times bestseller and shocking “tour de force from America’s best true crime writer” (Kirkus Reviews)—which formed the basis for the Lifetime movie event A House on Fire—follows a woman whose seemingly perfect

life hides a destructive madness. In this harrowing New York Times bestseller, Ann Rule is at her masterful best as she winnows horrific truths from the ashes of what seemed like paradise in Prairie Village, Kansas. Rule probes the case of Debora Green, a doctor and a loving mother who seemed to epitomize the dreams of the American heartland. A small-town girl with a genius IQ, she achieved an enviable life: her own medical practice, a handsome physician husband, three perfect children, and an opulent home in an exclusive Kansas City suburb. But when a raging fire destroyed that home and took two lives, the trail of clues led investigators to a stunning conclusion. Piece by piece, Ann Rule digs beneath this placid Midwestern facade to unveil a disturbing portrait of strangely troubled marriages, infidelity, desperation, suicide, and escalating acts of revenge that forever changed dozens of lives.

The Wheel. A ring of ice and steel turning around a moon of Saturn, and home to a mining colony supplying a resource-hungry Earth. It's a bad place to grow up. The colony has been plagued by problems. Maybe it's just gremlins, just bad luck. But the equipment failures and thefts of resources have been increasing, and there have been stories among the children of mysterious creatures glimpsed aboard the Wheel. Many of the younger workers refuse to go down the warren-like mines

anymore. And then sixteen-year-old Phee Laws, surfing Saturn's rings, saves an enigmatic blue box from destruction. Aboard the Wheel, the Doctor, Jamie and Zoe find a critical situation; and they are suspected by some as the source of the sabotage. They soon find themselves caught in a mystery that goes right back to the creation of the solar system. A mystery that could kill them all.

From the unique mind of Douglas Adams, legendary author of *The Hitchhiker's Guide to the Galaxy*, comes *Shada*, a story scripted for the television series *Doctor Who* but never produced—and now transformed into an original novel. A little knowledge is a dangerous thing. Imagine how dangerous a LOT of knowledge is... The Doctor's old friend and fellow Time Lord, Professor Chronotis, has retired to Cambridge University, where among the other doddering old professors nobody will notice if he lives for centuries. He took with him a few little souvenirs—harmless things really. But among them, carelessly, he took *The Worshipful and Ancient Law of Gallifrey*. Even more carelessly, he has loaned this immensely powerful book to clueless graduate student Chris Parsons, who intends to use it to impress girls. *The Worshipful and Ancient Law* is among the most dangerous artifacts in the universe; it cannot be allowed to fall into the wrong hands. The hands of the sinister Skagra are unquestionably the wrongest ones possible.

Skagra is a sadist and an egomaniac bent on universal domination. Having misguessed the state of fashion on Earth, he also wears terrible platform shoes. He is on his way to Cambridge. He wants the book. And he wants the Doctor...

"Dekker is a private eye; an honest one. But when Al Capone hires him to investigate a new joint called 'Doc's,' he knows this is one job he can't refuse. And just why are the Doctor and Ace selling illegal booze in a town full of murderous gangsters? Meanwhile, Bernice has been abandoned on a vampire-infested planet outside normal space. There she meets a myterious stranger called Romanadvoratrelundar -- and discovers an ancient and malevolent power, linking 1929 Chicago with a lair of immortal evil."--Page 4 of cover.

In a bizarre world shared by people and intelligent animals, Conrad Metcalf, a human private detective, finds out one of his cases has drawn him into a conflict between gangsters and the Inquisitor's office

elated when the hospital's elite cardiac transplant team taps her as a potential recruit. But Abby soon makes an anguished, crucial decision that jeopardizes her entire career. A car crash victim's healthy heart is ready to be harvested; it is immediately cross-matched to a wealthy private patient, Nina Voss. Abby hatches a bold plan to make sure that the transplant goes instead to a dying seventeen-year-old boy who is also a perfect match. The repercussions are powerful and swift and Abby is shaken but unrepentant—until she meets the frail, tormented Nina. Then a new heart for Nina Voss suddenly appears, her transplant is completed, and Abby makes a terrible discovery: Nina's heart has not come through the proper channels. Defying Bayside Hospital's demands for silence, Abby plunges into an investigation that reveals an intricate, and murderous, chain of deceptions. Every move Abby makes spawns a vicious backlash and, in a ship anchored in the stagnant waters of Boston Harbor, a final, grisly discovery lies waiting...
