This study is the first to assess the combined significance of the English-language newspapers of China, Japan and Korea in the period 1918-45. It frames the English-language press networks in the international media history of East Asia, relating them to media developments in the 'British world' linking Fleet Street to the Empire and Dominions.

Now in its second edition, *How to Read Texts* introduces students to key critical approaches to literary texts and offers a practical introduction for students developing their own critical and close-reading skills. Written in a lively, jargon-free style, it explains critical concepts, approaches and ideas including: - Debates around critical theory - The role of history and context - The links between creativity and criticism - The relationship between author, reader and text. The new edition now includes guidance on analysing a range of multi-media texts, including film and online media as well as the purely literary. In addition to new practical examples, readings, exercises and 'checkpoints' that help students to build confidence in their own critical readings of both primary and secondary texts, the book now also offers guidance on writing fully-formed critical essays and tips for independent research. Comprehensively updated and revised throughout, *How to Read Texts* is an indispensable guide for students making the transition to university study.

This volume gathers researchers from around the world endeavouring to better understand a number of perennial issues in assessing Chinese learners of English, covering topics such as students' test performances, interactional competence and lexical knowledge, students'

motivation, teachers' attitudes and assessment policy changes.

The spread of English is so much an integral part of globalization that it has become an essential global literacy skill. In Asia, this poses immense challenges to governments and English language teaching and teacher education professions as they attempt to meet this demand from students for a high level of English proficiency. This volume examines English language education policies across ten Asian jurisdictions, the corresponding teacher education policies, and how these policies affect teachers and teacher educators. Each chapter covers a different jurisdiction, and is written by a scholar engaged in the implementation of government policies on English language and teacher education, providing the reader with insiders' perspectives. It gives a fascinating glimpse into the remarkable similarities in the challenges posed to these countries and the critical issues that have emerged from the local responses despite their markedly different socioeconomic, political, cultural and historical backgrounds.

This volume examines the role of English in academic and research settings in Europe and provides recommendations on the challenges posed by the dominance of English over national languages as languages of science and research dissemination; the need for language support for academics that need to disseminate their research in English; and the effect of past and present language policies.
