Heechee Rendezvous Heechee Saga 3: Frederik Pohl ...

Heechee Rendezvous is a science fiction novel by the American writer Frederik Pohl, published in 1984 by the Del Rey imprint of Ballantine Books. It is a sequel to Gateway and Beyond the Blue Event Horizon and is set about three decades after Gateway. It has been cataloged as the third book in a six-book series called Heechee or The Heechee Saga but Kirkus reviewed it as completing a trilogy and a German-language edition of the three books was published as the Gateway trilogy after all six were

Heechee rendezvous : a novel / by Frederik Pohl: Pohl ...

Heechee Rendezvous is a gripping continuation of Pohl's Heechee Saga. Once again, Robinette Broadhead returns as the main character, this time within a world that suffers from strife; from frequent terrorist activities, to mass hunger, the world is detailed as flawed, in light of the advancements made possible by the technology of the Heechee.

Heechee Rendezvous book by Frederik Pohl

The Heechee is portrayed as an advanced star-traveling race which explored the Milky Way Galaxy including the Earth's solar system many years ago and then disappeared even before the evolution of the genus Homo. Frederik Pohl introduced the Heechee Saga in the 1972 novel, "The Merchant of Venus" (commonly called as The Merchant of Venus Underground).

The Heechee do not appear until book three in the series, in which the reason for their absence is explained. Some 500,000 years earlier, the Heechee were active in exploring the galaxy, including an Australopithecine-inhabited Earth (where a sampling of the creatures were extracted and left to propagate to modern time on a Heechee station).

first contact with the mysterious alien Heechee, the author spends a lot more time and energy describing the relationship between the main character, eccentric millionaire Robin Broadhead, and his AI servant nicknamed "Albert Einstein".

Frederik Pohl was on a streak when this Hugo Award-finalist novel was published in 1980. Now back in print after an absence of nearly a decade, this unique science fiction novel is as fresh and entertaining as ever. The story begins when the hero of Gateway finances an expedition to a distant alien spaceship that may end famine forever. On the ship, the explorers find a human boy, and evidence that reveals a powerful alien civilization is thriving on a transport ship headed right for Earth.... Wealth . . . or death. Those were the choices Gateway offered. Humans had discovered this artificial spaceport, full of working interstellar ships left behind by the mysterious, vanished Heechee. Their destinations are preprogrammed. They are easy to operate, but impossible to control. Some came back with discoveries which made their intrepid pilots rich; others returned with their remains barely identifiable. It was the ultimate game of Russian roulette, but in this resource-starved future there was no shortage of desperate volunteers.

storytelling sensation. The historic collaboration between Frederik Pohl and his fellow founding father of the genre, Arthur C. Clarke, is both a momentous literary event and a fittingly grand farewell from the late, great visionary author of *2001: A Space Odyssey*. *The Last Theorem* is a story of one man's mathematical obsession, and a celebration of the human spirit and the scientific method. It is also a gripping intellectual thriller in which humanity, facing extermination from all-but-omnipotent aliens, the Grand Galactics, must overcome differences of politics and religion and come together . . . or perish. In 1637, the French mathematician Pierre de Fermat scrawled a note in the margin of a book about an enigmatic theorem: "I have discovered a truly marvelous proof of this proposition which this margin is too narrow to contain." He also neglected to record his proof elsewhere. Thus began a search for the Holy Grail of mathematics—a search that didn't end until 1994, when Andrew Wiles published a 150-page proof. But the proof was burdensome, overlong, and utilized mathematical techniques undreamed of in Fermat's time, and so it left many critics unsatisfied—including young Ranjit Subramanian, a Sri Lankan with a special gift for mathematics and a passion for the famous "Last Theorem." When Ranjit writes a three-page proof of the theorem that relies exclusively on knowledge available to Fermat, his achievement is hailed as a work of genius, bringing him

fame and fortune. But it also brings him to the attention of the National Security Agency and a shadowy United Nations outfit called Pax per Fidem, or Peace Through Transparency, whose secretive workings belie its name. Suddenly Ranjit—together with his wife, Myra de Soyza, an expert in artificial intelligence, and their burgeoning family—finds himself swept up in world-shaking events, his genius for abstract mathematical thought put to uses that are both concrete and potentially deadly. Meanwhile, unbeknownst to anyone on Earth, an alien fleet is approaching the planet at a significant percentage of the speed of light. Their mission: to exterminate the dangerous species of primates known as homo sapiens.

The second installment in the Regeneration Trilogy It is the spring of 1918, and Britain is faced with the possibility of defeat by Germany. A beleaguered government and a vengeful public target two groups as scapegoats: pacifists and homosexuals. Many are jailed, others lead dangerous double lives, the "the eye in the door" becomes a symbol of the paranoia that threatens to destroy the very fabric of British society. Central to this novel are such compelling, richly imagined characters as the brilliant and compassionate Dr. William Rivers; his most famous patient, the poet Siegfried Sassoon; and Lieutenant Billy Prior, who plays a central role as a domestic intelligence agent. With

compelling, realistic dialogue and a keen eye for the social issues that have gone overlooked in mainstream media, *The Eye in the Door* is a triumph that equals *Regeneration* and the third novel in the trilogy, the 1995 Booker Prize-winning *The Ghost Road*, establishing Pat Barker's place in the very forefront of contemporary novelists.
