Its a Honda HR214 from 1983, and its special for a bunch of reasons. First off, its widely known as one of the best Honda Lawnmowers, and probably even one of the best lawnmowers ever made. Several reasons for this: 1.) The engine is the commercial gv120, not the consumer grade motors that Honda put in their later mowers 2.)

Hi Ric, I'm unclear on what has happened to make the Honda manuals unavailable at present, but am trying to work something out. You should eventually get a manual - I know we have a full workshop manual covering the very early (4 separate height levers, bar blade, and blade clutch) HR194 and HR214, so if that is what you want, there must be some way of sorting this out.

Bobby Foster, carhop at the chic Cafe Comedie, is going to the gas chamber. He's already confessed to the murder of Tracy Kostakos, the club's rising star. But two years after the crime, Tracy's body is still missing and Bobby's confession is full of holes. All Souls Legal Cooperative's final appeal sends San Francisco's number one PI Sharon McCone behind the footlights into the super-charged arena of anxious club owners and aspiring young hopefuls, into the fractured world of Tracy's privileged family and the mind of a young comedienne who was not the good little girl they thought they knew, and into a labyrinth of death and deception where someone will kill to laugh last and get away with murder.

Exploring the modern category of history in relation to film theory, film textuality, and film history, Change Mummified makes a persuasive argument for the centrality of historicity to film as well as the special importance of film in historical culture. What do we make of the concern for recovering the past that is consistently manifested in so many influential modes of cinema, from Hollywood to documentary and postcolonial film? How is film related to the many modern practices that define themselves as configuring pastness in the present, such as architectural preservation, theme parks, and, above all, professional historical research? What is the relation of history in film to other media such as television and digital imaging? How does emphasizing the connection between film and modern historicity affect the theorization and historicization of film and modern media culture? Pursuing the full implications of film as cultural production, Philip Rosen reconceptualizes modern historicity as a combination of characteristic epistemological structures on the one hand, and the social imperative to regulate or manage time on the other. Emphasizing a fundamental constellation of pursuit of the real, indexical signification and the need to control time, he interrogates a spectrum of film theory and film texts. His argument refocuses the category of temporality for film and cultural theory while rethinking the importance of historicity. An original and sustained meditation on the historiographic status of cinematic signs, Change Mummified is both an intervention in film and media studies and an argument for the continuing necessity of modern historical thinking in its contradictions.

Foundations of Geometry, Second Edition is written to help enrich the education of all mathematics majors and facilitate a smooth transition into more advanced mathematics courses. The text also implements the latest national standards and recommendations regarding geometry for the preparation of high school mathematics teachers--and encourages students to make connections between their college courses and classes they will later teach. This text's coverage begins with Euclid's Elements, lays out a system of axioms for geometry, and then moves on to neutral geometry, Euclidian and hyperbolic geometries from an axiomatic point of view, and then non-Euclidean geometry. Good proof-writing skills are emphasized, along with a historical development of geometry. The Second Edition streamlines and reorganizes material in order to reach coverage of neutral geometry as early as possible, adds more exercises throughout, and facilitates use of the open-source software Geogebra. This text is ideal for an undergraduate course in axiomatic geometry for future high school geometry teachers, or for any student who has not yet encountered upper-level math, such as real analysis or abstract algebra. It assumes calculus and linear algebra as prerequisites.

From a one-story cabin in the piney woods of the Panhandle to a high-rise condo along the glistening waterways, Cracker cooking in Florida has evolved with our tastes and times. When supplies were limited and the workday arduous, black coffee with leftover cornbread might serve as breakfast. Today's bounty and life's relative ease bring mornings with lattes and biscotti, biscuits and sausage gravy. What's on the plate has changed, but our heritage infuses who we are. As we follow the path laid out by gastronomic pioneers, this culinary quest, guided by sixth-generation Cracker Joy Sheffield Harris, will whet your appetite with recipes and sumptuous reflections. Pull up a chair and dig in.

Welcome to Dynamic Song Performance, a Singer's Bible. This may be the only how-to performance book for singers that is equally valuable to magicians, comics, actors, public speakers, models, performance coaches, and trial lawyers. Why? Because it focuses on audience psychology. The book explains what every performer must do to seduce the camera and the audience, to keep the crowds enthralled, and turn listeners and viewers into loyal fans. The Dynamic Song Performance Skills method begins by reinforcing successful performance skills while re-directing unsuccessful ones. Pepper Jay and her coaching partner, John Michael Ferrari, guide students through the general aspects of vocal, physical, emotional, and mental song performance skills required of a successful professional singer, performer, recording artist and entertainer. Pepper Jay then hones the student's skills to perfection while teaching audience psychology skills. Each student receives customized coaching depending upon their talents and their expressed goals. What makes a singer a star? Pepper drills into students' heads that there are many excellent singers who never "make it." Over several decades, Pepper Jay has developed powerful song performance guidelines that, when followed by talent who remain true to themselves, result in impressive success. This text, Dynamic Performance Skills, The Singers Bible, is a guide to the fundamentals of song performance, directed to both the novice singer with dreams of fame and fortune, as well as the professional singer who wants to increase mastery of song performance skills and be at the top of their craft.

Slow Burn tells how the superbike racing motorcycle developed out of the road-going sports-tourer to become one of the most successful competitions in all forms of motorcycle sport. As well as offering world championship class competition in its own right, superbike racing has been a highly competitive training ground for grand prix riders as well as helping manufacturers, distributors and dealers develop and improve their motorcycles. Superbike racing is to the motorcycle industry what touring car or NASCAR competition is to the car world – race on Sunday, sell on Monday. All the big names were drawn into the sport during its formative years and have been there ever since – Honda, Kawasaki, Suzuki, Yamaha, Ducati and Aprilia have all used superbike racing to test their street bike designs. And some of the biggest riders in the sport – Wayne Gardner, Wayne Rainey, Kevin Schwantz and Eddie Lawson – all started out on big, unruly superbikes, learning how to power slide their way around the world's toughest tracks. It's all in superbike – and it's all in Slow Burn.
