Honda Engines Honda K Engine
The Honda K-series engine is a line of four-cylinder four-stroke car engine introduced in 2001. The K-series engines are equipped with DOHC valvetrains and use roller rockers to reduce friction. The engines use a coil-on-plug, distributorless ignition system with a coil for each spark plug. This system forgoes the use of a conventional distributor-based ignition timing system in favor of a ...

Honda K20 and K24 Engine Specs - HCDMAG.COM

The K24 is one of several engines in Honda 's popular K-series. The series launched in 2001. The engines stand out for friction-reducing technology and electronically controlled ignition timing. All are four-stroke, four-cylinder engines. They are all made with short-block engines and sleeves made of cast iron.

HONDA JDM ENGINES AND TRANSMISSIONS – JDM Engine Zone

The Honda K-Series first appeared back in 2001, and now nearly 20-years later it has become one of the most ubiquitous Japanese engines out there. While the high-revving K20A appeared in cars like the Acura RSX and Honda Civic Si, the 2.4 liter K24 is even more plentiful in the US market where it 's powered millions Accords, CRVs, TSXs and many other Honda and Acura products. That means of course that there is no shortage of second hand engines to source for a potential swap.
