Winner of six Nebula and two Hugo awards for her fiction, Connie Willis is acclaimed for her gifted imagination and bold invention. Here are eleven of her finest stories, surprising tales in which the impossible becomes real, the real becomes impossible, and strangeness lurks at every turn. The end of the world comes not with a bang but a series of whimpers over many years in "The Last of the Winnebagos." The terror of pain and dying gives birth to a startling truth about the nature of the stars, a principle known as the "Schwarzschild Radius." In "Spice Pogrom," an outrageous colony in outer space becomes the setting for a screwball comedy of bizarre complications, mistaken identities, far-too-friendly aliens--and even true love.

Five years in the writing by one of science fiction's most honored authors, Domsday Book is a storytelling triumph. Connie Willis draws upon her understanding of the universalities of human nature to explore the ageless issues of evil, suffering and the indomitable will of the human spirit. For Kivrin, preparing an on-site study of one of the deadliest eras in humanity's history was as simple as receiving inoculations against the diseases of the fourteenth century and inventing an alibi for a woman traveling alone. For her instructors in the twenty-first century, it meant painstaking calculations and careful monitoring of the rendezvous location where Kivrin would be received. But a crisis strangely linking past and future strands Kivrin in a bygone age as her fellows try desperately to rescue her. In a time of superstition and fear, Kivrin/barely of age herself/ finds she has become an unlikely angel of hope during one of history's darkest hours. Praise for Domsday Book ¶A stunning novel that encompasses both suffering and hope. . . . The best work yet from one of science fiction's best writers.¶The Denver Post ¶Splendid work!brutal, gripping and genuinely harrowing, the product of diligent research, fine writing and well-honed instincts, that should appeal far beyond the normal science-fiction constituency.¶Kirkus Reviews (starred review) ¶The world of 1348 burns in the mind's eye, and every character alive that year is a fully recognized being. . . . It becomes possible to feel . . . that Connie Willis did, in fact, over the five years Domsday Book took her to write, open a window to another world, and that she saw something there.¶The Washington Post Book World

Winner of six Nebula and five Hugo awards, Connie Willis is one of the most acclaimed and imaginative authors of our time. Her startling and powerful works have redefined the boundaries of contemporary science fiction. Here in one volume are twelve of her greatest stories, including double award-winner "Fire Watch," set in the universe of Domsday Book and To Say Nothing of the Dog, in which a time-traveling student learns one of history's hardest lessons. In "A Letter from the Clearays," a routine message from distant friends shatters the fragile world of a beleaguered family. In "The Sidon in the Mirror," a mutant with the unconscious urge to become other people finds himself becoming both killer and victim. Disturbing, revealing, and provocative, this remarkable collection of short fiction brings together some of the best work of an incomparable writer whose ability to amaze, confound, and enlighten never fails.

From Connie Willis, winner of multiple Hugo and Nebula Awards, comes a comedic romp through an unpredictable world of mystery, love, and time travel . . . Ned Henry is badly in need of a rest. He's been shuttling between the 21st century and the 1940s searching for a Victorian atrocity called the bishop's bird stamp. It's part of a project to restore the famed Coventry Cathedral, destroyed in a Nazi air raid over a hundred years earlier. But then Verity Kindle, a fellow time traveler, inadvertently brings back something from the past. Now Ned must jump back to the Victorian era to help Verity put things right/not only to save the project but to prevent altering history itself.

The winner of multiple Hugo and Nebula Awards, Connie Willis capture the timeless essence of generosity and goodwill in this magical collection if Christmas stories. These eight tales-two of which have never before been published-boldly reimagine the stories of Christmas while celebrating the power of love and compassion. This enchanting treasury includes: "Miracle," in which a young woman's carefully devised plans to find romance go awry when her guardian angel shows her the true meaning of love "In Coppelius's Toyshop," where a jaded narcissist finds himself trapped in a crowded toy store at Christmastime "Epiphany," in which three modern-day wisemen embark on a quest unlike any they've ever experienced "Inn," where a choir singer gives shelter to a homeless man and his pregnant wife-only to learn later that there's much more to the couple than meets the eye And more

¶Connie Willis deploys the apparatus of science fiction to illuminate character and relationships, and her writing is fresh, subtle, and deeply moving.¶The New York Times Book Review Findriddy and Carson are two explorers sent to Boohte to survey the ridges and scrub-covered hills of the planet. Back home, their adventures are followed by countless breathless fans, but the reality is far less romantic as they deal with dust, nitpicking regulations, and uncooperative aliens. Teamed with a young intern whose speciality is mating customs, and a native guide of indeterminate gender, the group sets out for a previously unexplored sector of the planet. As they survey canyons and cataracts, battle dangers, and discover alien treasures, they will soon find themselves in alien territory of another kind: exploring the paths and precipices of sex. And love.

Connie Willis has won more Hugo and Nebula awards than any other science fiction author. Now, with her trademark wit and inventiveness, she explores the intimate relationship between science, pop culture, and the arcane secrets of the heart. Sandra Foster studies fads!from Barbie dolls to the grunge look!how they start and what they mean. Bennett O'Reilly is a chaos theorist studying monkey group behavior. They both work for the HiTek corporation, strangers until a misdelivered package brings them together. It's a moment of synchronicity!¶if not serendipity!which leads them into a chaotic system of their own, complete with a million-dollar research grant, caffè latte, tattoos, and a series of unlucky coincidences that leaves Bennett monkeyless, fundless, and nearly jobless. Sandra intercedes with a flock of sheep and an idea for a joint project. (After all, what better animal to study both chaos theory and the herd mentality that so often characterizes human behavior?) But scientific discovery is rarely straightforward and never simple, and Sandra and Bennett have to endure a series of setbacks, heartbreaks, dead ends, and disasters before they find their ultimate answer. . . . Praise for Bellwether ¶One of science fiction's best writers.¶The Denver Post ¶Connie Willis deploys the apparatus of science fiction to illuminate character and relationships, and her writing is fresh, subtle, and deeply moving.¶The New York Times Book Review ¶Keen social satire touched with genuine humanity . . . Connie Willis's fiction is one of the most intelligent delights of our genre.¶Locus ¶A sheer pleasure to read . . . Sprightly, intelligent fun.¶Publishers Weekly

One of those rare, unforgettable novels that are as chilling as they are insightful, as thought-provoking as they are terrifying, award-winning author Connie Willis's Passage is an astonishing blend of relentless suspense and cutting-edge science unlike anything you've ever read before. It is the electrifying story of a psychologist who has devoted her life to tracking death. But when she volunteers for a research project that simulates the near-death experience, she will either solve life's greatest mystery -- or fall victim to its greatest terror. At Mercy General Hospital, Dr. Joanna Lander will soon be paged -- not to save a life, but to interview a patient just back from the dead. A psychologist specializing in near-death experiences, Joanna has spent two years recording the experiences of those who have been declared clinically dead and lived to tell about it. It's research on the fringes of ordinary science, but Joanna is about to get a boost from an unexpected quarter. A new doctor has arrived at Mercy General, one with the power to give Joanna the chance to get as close to death as anyone can. A brilliant young neurologist, Dr. Richard Wright has come up with a way to manufacture the near-death experience using a psychoactive drug. Dr. Wright is convinced that the NDE is a survival mechanism and that if only doctors understood how it works, they could someday delay the dying process, or maybe even reverse it. He can use the expertise of a psychologist of Joanna Lander's standing to lend credibility to his study. But he soon needs Joanna for more than just her reputation. When his key volunteer suddenly drops out of the study, Joanna finds herself offering to become Richard's next subject. After all, who better than she, a trained psychologist, to document the experience? Her first NDE is as fascinating as she imagined it would be -- so astounding that she knows she must go back, if only to find out why this place is so hauntingly familiar. But each time Joanna goes under, her sense of dread begins to grow, because part of her already knows why the experience is so familiar, and why she has every reason to be afraid.... And just when you think you know where she is going, Willis throws in the biggest surprise of all -- a shattering scenario that will keep you feverishly reading until the final climactic page is turned.
