Arial} The Jeep CJ,
the icon that
started it all, is the
most popular off-
road vehicle of all
time. The look,
style, and
functionality of the
CJ made it instantly
popular and
recognizable the
world over, in no
doubt partly due to
its military

presence in World War II. The Jeep Wrangler platform had the difficult task of replacing the extremely popular CJ platform.

Outwardly similar in appearance, the YJ, TJ, and JK that followed all had significant design improvements, as

can be expected when a platform has a life span of more than five decades. The YJ was the first Chrysler release after it purchased AMC in the mid-1980s, and it was aimed at taming the original CJ for more comfort and, arguably, a

larger audience.

The TJ that followed next was an evolutionary update, significant in that it featured a coil spring suspension and the celebrated return of round headlights, for a more traditional look compared to the square lights of

the YJ. In Jeep TJ
1997-2006: How to

everything you
need to know
about how to

covered. Beginning
with why you
should choose a TJ

used these
differentials,
propelling these

history in the
process. Jeep CJs
and Cherokees

have used the
Dana 44 and AMC
20 and put these
differentials under
tremendous loads,
which often
requires frequent
rebUILds. After
years of use, these
differentials require
rebuilding, and of

They really are that popular. The CJ series arguably started after World War II with the CJ-2A being introduced to the masses, and while the early CJs have their share of enthusiasts, the largest group of enthusiasts began their love affair
