Since the beginning of human civilization, plants have been our true companions. Plants contribute not only to our existence but also serve us through discovery, design and the treatment of various diseases where there is no satisfactory cure in modern medicine. This has focused Natural Product Chemists to unravel plants therapeutic potential in the light of modern analytical and pharmacological understandings. Presence of multiple active phytochemicals in medicinal plants offers exciting opportunity for the development of novel therapeutics, providing scientific justification for their use in traditional medicines. Non-food plants have been recognized as biofactories for the production of eco-friendly value added materials including agricultural, food products, enzymes, nutraceuticals etc. They have also been widely explored for personal care, industrial products and sources of energy

generation. The proven efficacy of botanicals has been appreciated by the scientific community and strengthened plant-human relationship. The synergism in the Phytoproducts, the result of the interaction of two or more moieties, is not simply additive but multiplicative. Recent acceptance of the Food and Drug Administration (US) for herbal-medicine based preparation has renewed interest in Natural Product Research. The year 2011 is declared as the International Year of Chemistry (IYC 2011) by the United Nations Assembly. On this occasion, the present conference CPHEE 2011 aims to offer chemists from diverse areas to come to a common platform to share the knowledge and unveil the chemistry and magic potentials of phytoproducts for the mankind.

This Haynes Manual is a first-hand account of repairing and maintaining the Suzuki GSX-R1000 from 2009 – 2016. What makes Haynes Manuals unique, and what has given them success for over 55 years, is that each manual is written from a complete tear down and rebuild of the bike. Suzuki GSX-R1000, 2009-2016 is filled with 700 photos and expertly written text to ensure the next step is always clear. Even if you're new to bikes, you'll be able to keep yours on the road in style.

From elite marathoner and Olympic hopeful Becky Wade comes the story of her year-long exploration of diverse global running communities from England to Ethiopia—9 countries, 72 host families, and over 3,500 miles of running—investigating unique cultural approaches to the sport and revealing the secrets to the success of runners all over the world. Fresh off a successful collegiate running career—with multiple NCAA All-American honors and two Olympic Trials qualifying marks to her name—Becky Wade was no stranger to international competition. But after years spent safely sticking to the training methods she knew, Becky was curious about how her counterparts in other countries approached the sport to which she'd dedicated over half of her life. So in 2012, as a recipient of the Watson Fellowship, she packed four pairs of running shoes, cleared her schedule for the year, and took off on a journey to infiltrate diverse running communities around the world. What she encountered far exceeded her expectations and changed her outlook into the sport she loved. Over the next twelve months—visiting 9 countries with unique and storied running histories, logging over 3,500 miles running over trails, tracks, sidewalks, and dirt roads—Becky explored the varied approaches of runners across the globe. Whether riding shotgun around the streets of London with Olympic champion sprinter Usain Bolt, climbing for an hour at daybreak to the top of Ethiopia's Mount Entoto just to start her daily run, or getting lost jogging through the bustling streets of Tokyo, Becky's unexpected adventures, keen insights, and landscape descriptions take the reader into the heartbeat of distance running around the world. Upon her return

to the United States, she incorporated elements of the training styles she'd sampled into her own program, and her competitive career skyrocketed. When she made her marathon debut in 2013, winning the race in a blazing 2:30, she became the third-fastest woman marathoner under the age of 25 in U.S. history, qualifying for the 2016 Olympic Trials and landing a professional sponsorship from Asics. From the feel-based approach to running that she learned from the Kenyans, to the grueling uphill workouts she adopted from the Swiss, to the injury-recovery methods she learned from the Japanese, Becky shares the secrets to success from runners and coaches around the world. The story of one athlete's fascinating journey, *Run the World* is also a call to change the way we approach the world's most natural and inclusive sport.

TV presenter, writer and adventurer Alice Morrison gives her own unique and personal insight into Morocco, her home for 1001 nights. When Alice Morrison headed out to Morocco, it was to take on one of the most daunting challenges: to run in the famous Marathon des Sables. Little did she expect to end up living there. But as soon as she settled in a flat in Marrakech, she was won over by the people, the spectacular scenery and the ancient alleyways of the souk. Soon she was hiking over the Atlas mountains, joining nomads to sample their timeless way of life as they crossed the Sahara desert, and finding peace in a tranquil oasis. Despite more than 10 million tourists coming to Morocco each year, there is remarkably little that has been written about its people, their customs and the extraordinary range of places to visit, from bustling markets to vast, empty deserts. Alice makes sure she samples it all, and as she does she provides a stunning portrait of a beautiful country. As a lone woman, she often attracts plenty of curiosity, but her willingness to participate - whether thigh deep in pigeon droppings in a tannery or helping out herding goats - ensures that she is welcomed everywhere by a people who are among the most hospitable on the planet. Alice came to fame with her BBC2 series *Morocco to Timbuktu*, and now she joins the ranks of great travel writers who can bring a country vividly to life and instantly transport the reader to a sunnier place. If you're thinking of going to Morocco, or you want to recall your time there, *My 1001 Nights* is the ideal book.

This volume focuses on adsorption of solutions on solid surfaces using different experimental methods. Preparation and characterization of nanoparticles, nanocomposites are an interesting theme for material scientists. The environmental aspects of adsorption and the properties of dispersions and microemulsions, surfactants, polymers, clay minerals, are dealt with and a summary of the current results in interfacial phenomena and modern colloid science is given.

Since the first edition of this book, geometrical methods in the theory of ordinary differential equations have become very popular and some progress has been made partly with the help of computers. Much of this progress is represented in this revised, expanded edition, including such topics as the Feigenbaum universality of period doubling, the Zoladec solution, the Iljashenko proof, the Ecalle and Voronin theory, the Varchenko and Hovanski theorems, and the Neistadt theory. In the selection of material for this book, the author explains basic ideas and methods applicable to the study of differential equations. Special efforts were made to keep the basic ideas free from excessive technicalities. Thus the most fundamental questions are considered in great detail, while of the more special and difficult parts of the theory have the character of a survey. Consequently, the reader needs only a general mathematical knowledge to easily follow this text. It is directed to mathematicians, as well as all users of the theory of differential equations.

Practical guide for anyone planning a long-distance motorcycling trip. Choosing, preparing and equipping a motorbike, documentation and shipping, life on the road, trans-continental route outlines: Asia, Africa & Latin America. Updated and now in full colour, this best-seller has been in print for almost 30 years.
