Soil Sampling and Methods of Analysis is a practical methods manual and resource handbook that covers a wide array of methods for analyzing soil chemical, biological, biochemical, and physical properties. Soil testing for plant nutrients and methods to characterize organic soils and frozen soils are also provided. The book presents recent improvements in methodology, outlines new methods, and characterizes the best methods available for selecting appropriate analysis techniques. Methods have been selected for their accuracy, speed, and ease of duplication. References are provided for each method. The book is ideal for scientists, engineers, and students in agriculture, horticulture, forestry, geography, remote sensing, environmental science, and land-use planning.

Ecology at the ecosystem level has both necessitated and benefited from new methods and technologies as well as those adapted from other disciplines. With the ascendancy of ecosystem science and management, the need has arisen for a comprehensive treatment of techniques used in this rapidly-growing field. Methods in Ecosystem Science answers that need by synthesizing the advantages, disadvantages and tradeoffs associated with the most commonly used techniques in both aquatic and terrestrial research. The book is divided into sections addressing carbon and energy dynamics, nutrient and water dynamics, manipulative ecosystem experiements and tools to synthesize our understanding of ecosystems. Detailed information about various methods will help researchers choose the most appropriate methods for their particular studies. Prominent scientists discuss how tools from a variety of disciplines can be used in ecosystem science at different scales.

An updated edition of the classic work on the inorganic chemistry of soils. \* With its companion volume, Humus Chemistry, forms a complete, advanced-level treatment of both organic and inorganic aspects of soil chemistry. \* Revised to keep pace with the latest developments in the field. \* Provides more in-depth treatment of all topics.
