## **Musical Performance edited by John Rink - Cambridge Core**

Musical performance is a fundamental part of human existence, yet even the most experienced performer, teacher or scholar can fail to appreciate what lies behind it. It is well known that a performance in public usually represents untold hours - indeed many years - of learning and preparation, but how interpretations are put together, on what basis and with what effect may be less widely understood.

## Read Book Musical Performance A Guide To Understanding

Music performance requires a high degree of physical skill, yet until recently, musical training has paid little attention to the considerable demands made on the mind and body. *The Biology of Musical Performance and Performance-Related Injury* presents singers and instrumentalists with accurate information on the physical processes that underlie their craft. The book provides a concise overview of the biological principles associated with performance technique while assuming no prior scientific knowledge, making it accessible to both musicians and to health professionals who treat performance-related medical conditions. Author Alan H. D. Watson explains the concepts and techniques of music performance, discussing themes such as posture and the back; movements of the arm and hand and associated problems; breathing in singers and wind players; the embouchure and respiratory tract in wind playing; the larynx and vocal tract in singers; the brain and its role in skill acquisition and aural processing; and stress and its management. Watson offers performers and teachers the tools they need to create a rational approach to the development and communication of technique. He also provides insight into the origins of performance-related injury, helping to reduce the risk of such problems by encouraging a technique that is sustainable in the long term. Each chapter includes several illustrations and an extensive bibliography for further reading. To support the text, a CD-Rom is included, featuring original diagrams that clearly illustrate the relevant aspects of body structure and function, explaining and illuminating key concepts through an extensive set of animations, sound files, and videos.

Offers performers, teachers, and researchers, new perspectives and practical guidance for enhancing performance and managing the stress that typically accompanies performance situations. It draws together the findings of pioneering initiatives from across the arts and sciences.

In *The Musician's Way*, veteran performer and educator Gerald Klickstein draws on the latest research and his 30 years of professional experience to provide aspiring musicians with a roadmap to artistic excellence. Written in a conversational style, the text articulates landmark strategies that equip readers to advance their musical abilities and succeed as performing artists.

Muziekhistorisch en musicologisch overzicht van de klassieke solozang vanaf de barok tot heden.

'Musicians in the Making' explores the creative development of musicians in formal and informal learning

## Read Book Musical Performance A Guide To Understanding

contexts. It promotes a novel view of creativity, arguing that creative learning is a complex, lifelong process. Sixteen extended chapters by leading experts are featured alongside ten 'insights' by internationally prominent performers and teachers.

Suggests techniques for overcoming self-consciousness and improving musical performances, shares a variety of exercises, and includes advice on improving one's listening skills

This book discusses all aspects of computing for expressive performance, from the history of CSEMPs to the very latest research, in addition to discussing the fundamental ideas, and key issues and directions for future research. Topics and features: includes review questions at the end of each chapter; presents a survey of systems for real-time interactive control of automatic expressive music performance, including simulated conducting systems; examines two systems in detail, YQX and IMAP, each providing an example of a very different approach; introduces techniques for synthesizing expressive non-piano performances; addresses the challenges found in polyphonic music expression, from a statistical modelling point of view; discusses the automated analysis of musical structure, and the evaluation of CSEMPs; describes the emerging field of embodied expressive musical performance, devoted to building robots that can expressively perform music with traditional instruments.
