Strategies to achieve winning results in the inclusive secondary classroom! Backed by the author's three decades of experience, this reader-friendly guidebook provides teachers with a practical approach for creating a successful inclusive secondary classroom. Toby J. Karten helps teachers use a variety of strategies, including differentiated instruction, universal design for learning, brain-based learning, RTI, and evidence-based practice. With helpful forms, activities, graphic organizers, and quotations throughout, this resource: Outlines the theoretical background for creating an inclusive classroom environment Describes the psychosocial, cognitive, physical, and moral development of adolescents and how they affect teaching practice Provides research-based practices to maximize and honor learners' potentials and strengths

Bishop's text shows students how to break the material of preparatory chemistry down and master it. The system of objectives tells the students exactly what they must learn in each chapter and where to find it.
