This clear and easy to follow text has been revised to meet modern exam requirements: - New material on forces, machines, motion, properties of matter, electronics and energy - Actual GCSE and Standard Grade exam questions - Problem-solving investigations - Practice in experimental design

This course study guide is designed to complement New Understanding Chemistry for Advanced Level, but it can be used with any other core textbook for AS and A Level Chemistry as well. It aims to help further develop chemistry skills such as laboratory techniques, mathematical methods and data handling. The course study guide also provides outline solutions to a selection of questions and gives advice on answering all types of examination questions and support for Key Skills.

This second edition is suitable for use with all Boards' syllabuses. The introduction clearly explains what the exam is trying to assess and how it does it. Organised thematically, each chapter gives short summaries of the facts and principles of each syllabus topic. Other special features include: * clear definitions of important terms used in biology kick off every chapter * recent questions answered in full to help your understanding.

Everything you need for success in Accounting at A-Level.

This second edition of a GCSE computer studies text includes chapters on personal computers and desktop publishing, spreadsheets and their applications, and detailed case studies illustrating how a computer system can revolutionize the working environment. The Data Protection Act is also included, together with project work, an extended section on coursework, advice on how to revise and hints on how to pass examinations. Key words are explained in the text in context and highlighted with bold type, and also explained in an extensive glossary.
