Research on natural fiber composites is an emerging area in the field of polymer science with tremendous growth potential for commercialization. *Hybrid Natural Fiber Composites: Material Formulations, Processing, Characterization, Properties, and Engineering Applications* provides updated information on all the important classes of natural fibers and their composites that can be used for a broad range of engineering applications. Leading researchers from industry, academia, government, and private research institutions from across the globe have contributed to this highly application-oriented book. The chapters showcase cutting-edge research discussing the current status, key trends, future directions, and opportunities. Focusing on the current state of the art, the authors aim to demonstrate the future potential of these materials in a broad range of demanding engineering applications. This book will act as a one-stop reference resource for academic and industrial researchers working in R&D departments involved in designing composite materials for semi structural engineering applications. Presents comprehensive information on the properties of hybrid natural fiber composites that demonstrate their ability to improve the hydrophobic nature of natural fiber composites Reviews recent developments in the research and development of hybrid natural fiber composites in various engineering applications Focuses on modern technologies and illustrates how hybrid natural fiber composites can be used as alternatives in structural components subjected to severe conditions

Few subjects are as important, yet ignored or misapplied, as the one addressed in this book. Jesus Christ is the absolute center and focus of the totality of God's word. Many people confess this belief, since Jesus himself taught it (Luke 24:27; John 5:39). Christians have done well to see this on one or two levels. Yet, truly understanding just how primary he is as an actor—even in the Old Testament—is something few have considered. In this revised and expanded edition of *From the Shadows to the Savior* (2015), Douglas Van Dorn helps us see the light of Christ that emerges from the dark hallways of Scriptures that so many find outdated, unintelligible, and irrelevant for today's Church. Learn how Christ is found in such things as prophecy, typology, and the law. Then, come in for a deeper study of how the Person himself is actually present, walking, speaking, and acting, beginning in the very first book of the Bible. Learn how words such as "Word," "Name," "Glory," and "Wisdom" are all ideas that the Scripture itself attaches to Christ who in the OT is called The Angel of the LORD. Then see if such ideas don't radically change the way you think about all of God's word in this truly life-changing summary of Christ in the Old Testament. This edition contains three new chapters (Christ the Power, Christ the Face, and Christ the Shepherd), has been reworked to make sections even clearer, contains new resources, and study questions. It is the perfect book for a study guide on Christ in the Old Testament. "A certain kind of delight comes over the Christian when he or she discovers glorious truths in the Bible that were somehow missed or misinterpreted throughout one's life. I experienced this many times in reading Pastor Van Dorn's insightful work. Surely, Christ is found throughout the Old Testament and his ministry precedes his achievements through the Incarnation." Douglas Groothuis (Ph.D.) Professor of Philosophy, Denver Seminary Author of *Christian Apologetics: A Comprehensive Case for Biblical Faith*
