750,000 jobs. The International Chamber of Commerce puts the global fiscal loss at more than \$600 billion a year. *Secrets Stolen, Fortunes Lost* offers both a fascinating journey into the underside of the Information Age, geopolitics, and global economy, shedding new light on corporate hacking, industrial espionage, counterfeiting and piracy, organized crime and related problems, and a comprehensive guide to developing a world-class defense against these threats. You will learn what you need to know about this dynamic global phenomenon (how it happens, what it costs, how to build an effective program to mitigate risk and how corporate culture determines your success), as well as how to deliver the message to the boardroom and the workforce as a whole. This book serves as an invaluable reservoir of ideas and energy to draw on as you develop a winning security strategy to overcome this formidable challenge.

"This report reviews what is known about forgetting as it applies to military tasks. It includes research conducted by the Army Research Institute as well as related work performed by the Air Force and Navy and leading academic institutions. The report distinguishes the memory for knowledge and skill related to procedural tasks, cognitive tasks, and perceptual-motor tasks. Memory for task knowledge has been demonstrated to be quite good. Memory for cognitive skills has been demonstrated to be quite good. Memory for psychomotor skills varies, depending on whether the task is continuous, such as riding a bicycle, or discrete, such as executing the separate performance steps involved in disassembling a rifle. Throughout the report, figures depict the relative sustainment or decay of a skill as reported in the research literature. A final section concerns the factors that influence the reacquisition of a skill after extended periods of nonuse, as might occur during a mobilization."--DTIC.

Container loads are loads that are rigged for airdrop in airdrop containers such as the A-7A cargo sling, the A-21 cargo bag, and the A-22 cargo bag. In addition, flat steel strapping is used to rig container loads. The containers are packed with supplies, disassembled equipment, or small items of ready-to-use equipment prepared for airdrop. The container load requires cushioning material such as honeycomb, felt, or cellulose wadding, depending on the load requirements and the method of airdrop. The number and types of parachutes required to stabilize and retard the descent of the load depends on the type of container used, the weight of the load, and the type of airdrop.

The Japanese attack on Hawaii provoked the never-ending story. Multiple official investigations and private historical inquiries into the attack and its background have generated enormous stocks of info. about both the American and Japanese sides. Even so, info. gaps still exist, and many important questions remain under debate. The authors of this report have focused on two of the event's controversies, the Winds Message and the state of U.S. communications intelligence prior to the Hawaiian attack. This assemblage of documents, supplemented by the authors' clear guide to their meaning, places the reader right in the middle of the behind-the-scenes events and helps the scholar and
