Primary Care. East Tennessee Children's Hospital operates thirteen Primary Care Pediatrician offices throughout the East Tennessee area. It is vital to your child's health to establish them with a pediatrician when they are born, or when moving into the area.

Rev. ed. of: Practice guidelines for pediatric nurse practitioners / [edited by] Beth Richardson.

Focusing on common pediatric conditions seen in primary care settings, this text provides novice, expert, and student nurse practitioners with increased knowledge on the most up to date recommendations about common childhood diseases and conditions. Health promotion and maintenance, child development, and family-centered care are consistently featured in each chapter, emphasizing the need to holistically care for a child based on their specific background and condition. Growth and developmental concepts are grounded in evidence-based research to help practitioners appreciate the physiologic and cognitive differences in children along with diverse community and cultural aspects of care. User-friendly information is consistently organized in outline/bulleted format to facilitate speedy access to vital knowledge. Organized by body system, each chapter provides the reader with useful information such as the etiology, epidemiology, clinical manifestations, physical findings, diagnostic tests, differential diagnosis, treatment, follow-up and complications, and family education. Case scenarios explore each topic further and include questions and answers that help the clinician choose the best intervention for the patient and their family. Key Features: Delivers comprehensive, evidence-based practice pediatric guidelines for experienced and novice clinicians Stresses the importance of the nurse's role in pediatric health promotion Written in outline/bulleted format for speedy access to key information Contains abundant case studies and related Q&As to determine the best intervention Includes a full-color image bank of dermatological conditions

Safety competency is now emphasized via the new Practice Alert highlights and integration of National Patient Safety Goals and Core Measures. The Informatics competency is addressed with new informatics content in a refocused Strategies for Managing a Pediatric Health Care Practice chapter. The Teamwork and Collaboration competency is addressed by new content on the trending topic of interprofessional collaboration, also in the Strategies for Managing a Pediatric Health Care Practice chapter. The Evidence-Based Practice competency is integrated through icons that reference evidence-based guidelines. Reorganized application of Gordon's Functional Health Patterns provides a more conceptually consistent flow with Gordon's model. Expanded integration of Healthy People 2020 goes beyond the emphasis on physical activity in the previous edition. Expanded coverage of health literacy includes application of health literacy principles - the ability to obtain, read, understand, and use healthcare information to make appropriate health decisions and follow instructions for treatment - in relevant chapters. Additional coverage of growth and development includes a thorough revision of the chapter on developmental management in pediatric primary care along with inclusion of developmental milestones in appropriate chapters. Expanded coverage of assessment, genetics and epigenetics, mental health issues, the Children with Special Health Care Needs (CSHCN) Services Program, and global health reflect the growing impact of these trends on pediatric primary care. Updated coverage of the Affordable Care Act includes a focus on the impact of the Affordable Care Act (including Medicaid expansion) and its implications for access to pediatric healthcare. Updated coverage of the Bright Futures guidelines goes beyond the previous edition's focus on mental health and sexual development. NEW! Focus on diversity (vs culture) offers a greater emphasis on diversity in its many dimensions rather than on culture alone. Refocused practice management chapter has been retitled Strategies for Managing a Pediatric Health Care Practice and eliminates general practice management content that is already covered in other parts of the curriculum to focus on content more specific to pediatric practice management - including the various settings for pediatric primary care, informatics, and other essential topics influenced by the Affordable Care Act, National Patient Safety Goals, and the growing trend of interprofessional collaboration.

Written by nurse practitioners for nurse practitioners in collaboration with a physician, this popular text builds a solid understanding of the theoretical foundation of nursing practice, while also providing comprehensive patient-care guidance based on the latest scientific evidence.
