Peoplesoft Application Engine Exit

In an App Engine PeopleCode, it's not uncommon to see code that works on the following logic. You have a condition and if it's TRUE, you want Exit (1) to execute. If the condition is FALSE, you would like Exit (0) to execute. Depending on the way in which you have designed the App Engine, this can completely change its flow.

Difference between Exit(1) and Exit(0)? | PeopleSoft ...

Exit(0) – Terminates the current PeopleCode Action in application engine. Exit(1) – Terminates the current Step in application engine.
