Permutations vs Combinations - Kuta Software LLC

Let's define both of them individually.

The permutation is defined as all the ways of doing things where we care about the order of the elements. For instance, the pin code of your ATM card is 2468, so if you put 2648, then it will deny your request.

Combination, on the other hand, is considered as the selection of all the ways without caring about the order for elements.
