Gorillas using iPads, lemurs finger painting, squirrel monkeys popping bubbles . . . these primates are pretty smart! Could you make the grade in Primate School? Learn how diverse the primate family is, and some of the ways humans are teaching new skills to their primate cousins. Author Jennifer Keats Curtis is once again working with organizations across the country to share fun facts about primates through this photo journal.

In The Solution for Marriages, Jeff Murphy and Chuck Dettman show you what God's fascinating design for marriage is and how successful marriage mentors, pastors and counselors are teaching couples to build awesome marriages. This guide masterfully combines timeless biblical wisdom, critical relationship skills, and empowering resources that have led many couples to a successful marriage.While the vast majority of weddings take place in churches, few are prepared to provide pre-marriage mentoring and ongoing marriage enrichment training that comprehensively covers biblical principles and best practices. Readers of the The Solution for Marriages will be able to more effectively help couples address their unique issues and prepare for lifelong marriage. When this type of skilled marriage mentorship is provided, divorce is virtually eliminated!

This manual is for use by scientists and technicians who screen and evaluate varieties of sorghum and pearl millet for their grain quality. It is based on experience in agronomy and food technology acquired over several years in SADC/ICRISAT's Sorghum and Millet Improvement Program in Zimbabwe, hwre there is a focus on generalized screening methods for broad grain qualities rather than detailed component analysis of a molecular nature. Laboratory procedures, including qualitative and quantitative methods, were compiled from existing sources and modified in several ways for the Program's use. Quality parameters were focused on grain, on primary products such as flour, meal, and malt, and on such secondary products as baked flour, steamed flour, and porridge. The grain and these products were evaluated using physical and chemical methods, and a database was created to serve as an empirical reference document derived from field and laboratory results. The manual's first section, on grain-quality evaluation, describes rapid techniques for routine screening. The qualitative parameters used are: color, pericarp thickness, testa, endosperm texture, and hardness. Quantitative parameters comprise 100-kernel weight, Agtron readings, and moisture, floaters, dehulling loss, milling yield, size fractions, and water absorption expressed as percentages. Eight chemical methods of evaluation are described in the second section, among which only rapid tannin analysis forms part of routine screening tests. The last section (...).
