This book studies the political integration of Indian diaspora communities into their host societies. It argues that insertion occurs on an ethnic basis which enables these groups to utilise their clout, and at the same time exert collective rights in matters like freedom of religion, organisation and lifestyle. Drawing on case studies from South Africa, America, and the Caribbean, the volume analyses different forms, levels and patterns of groupist political integration. It examines various instances of integration such as anti-Indian apartheid laws; the life and times of Dr Sudhindra Bose, one of the early Bengali intellectuals in the US; Hindutva organisations in the US/UK; as well as the introduction of the Overseas Citizen of India (OCI) Scheme by the Indian government. An important intervention in the study of ethnic groups and their integration, the book will be of interest to students and researchers of diaspora studies, globalization and transnational migration, cultural studies, minority studies, sociology, political studies, international relations, and South Asian studies.

H.264 Advanced Video Coding or MPEG-4 Part 10 is fundamental to a growing range of markets such as high definition broadcasting, internet video sharing, mobile video and digital surveillance. This book reflects the growing importance and implementation of H.264 video technology. Offering a detailed overview of the system, it explains the syntax, tools and features of H.264 and equips readers with practical advice on how to get the most out of the standard. Packed with clear examples and illustrations to explain H.264 technology in an accessible and practical way. Covers basic video coding concepts, video formats and visual quality. Explains how to measure and optimise the performance of H.264 and how to balance bitrate, computation and video quality. Analyses recent work on scalable and multi-view versions of H.264, case studies of H.264 codecs and new technological developments such as the popular High Profile extensions. An invaluable companion for developers, broadcasters, system integrators, academics and students who want to master this burgeoning state-of-the-art technology. "[This book] unravels the mysteries behind the latest H.264 standard and delves deeper into each of the operations in the codec. The reader can implement (simulate, design, evaluate, optimize) the codec with all profiles and levels. The book ends with extensions and directions (such as SVC and MVC) for further research." Professor K. R. Rao, The University of Texas at Arlington, co-inventor of the Discrete Cosine Transform

Essentials of Marketing is a brief version of Basic Marketing, the worldwide market leading Principles text. Basic Marketing and Essentials of Marketing are the first books to develop and present the 4Ps framework (Product, Price, Place, Promotion) which describes the components of the marketing mix and forms the foundation of Marketing. Like Basic Marketing, Essentials of Marketing offers a very thorough integration of the latest marketing themes, topics, and examples woven throughout. While Essentials of Marketing is a brief text, it is not a cut-and-paste of Basic Marketing. It is written carefully, thoroughly and specifically to be suitable for shorter Marketing courses. Author Bill Perreault shows this same dedication to the supplements package. Where most principles of marketing texts have separate supplement authors, Bill Perreault creates every item in the package. This unique involvement ensures quality, accuracy, and reliability.
