(pronounced C-sharp). Through its first year, SharpCap remained a fairly simple webcam capture application that was designed to be easy to use, to use standard, familiar Windows UI elements and to show the controls for the camera to the user at all times. This seemed to be enough of an improvement over the

Micro Saint Sharp is a general purpose, discrete-event simulation software tool. Micro Saint Sharp's intuitive graphical user interface and flow chart approach to modeling make it a tool that can be used by generalists as well as simulation experts. Micro Saint Sharp has proven to be an invaluable asset in both small businesses and Fortune 500 companies and in many areas including the military, human factors, health care, manufacturing, and the service industry. The user manual has been updated for software version 3.8. Some new features are the ability to add swim lanes to any network background, data exchange capability with the UML/SysML tool MagicDraw, and a updated version of the built-in OptQuest optimization.

SHARP is an advanced modeling and simulation toolkit for the analysis of nuclear reactors. It is comprised of several components including physical modeling tools, tools to integrate the physics codes for multi-physics analyses, and a set of tools to couple the codes within the MOAB framework. Physics modules currently include the neutronics code PROTEUS, the thermal-hydraulics code Nek5000, and the structural mechanics code Diablo. This manual focuses on performing multi-physics calculations with the SHARP ToolKit. Manuals for the three individual physics modules are available with the SHARP distribution to help the user to either carry out the primary multi-physics calculation with basic knowledge or perform further advanced development with in-depth knowledge of these codes. This manual provides step-by-step instructions on employing SHARP, including how to download and install the code, how to build the drivers for a test case, how to perform a calculation and how to visualize the results. Since SHARP has some specific library and environment dependencies, it is highly recommended that the user read this manual prior to installing SHARP. Verification tests cases are included to check proper installation of each module. It is suggested that the new user should first follow the step-by-step instructions provided for a test problem in this manual to understand the basic procedure of using SHARP before using SHARP for his/her own analysis. Both reference output and scripts are provided along with the test cases in order to verify correct installation and execution of the SHARP package. At the end of this manual, detailed instructions are provided on how to create a new test case so that user can perform novel multi-physics calculations with SHARP. Frequently asked questions are listed at the end of this manual to help the user to troubleshoot issues.

Micro Saint Sharp is a general purpose, discrete-event simulation software tool. Micro Saint Sharp's intuitive graphical user interface and flow chart approach to modeling make it a tool that can be used by generalists as well as simulation experts. Micro Saint Sharp has proven to be an invaluable asset in both small businesses and Fortune 500 companies and in many areas including the military, human factors, health care, manufacturing, and the service industry.

VISSIM is the leading microscopic simulation program for multi-modal traffic flow modeling. With its unique high level of detail it accurately simulates urban and highway traffic, including cyclists and motorized vehicles. VISSIM is the ideal tool for transportation professionals who want to simulate different traffic scenarios before starting implementation. It thus allows them to find a solution which takes traffic and transportation quality, safety and cost into consideration. As VISSIM combines traffic engineering expertise and state-of-the-art presentation options, even 3D animations, it is not only used by transportation professionals. More and more decision makers and local authorities are choosing VISSIM to convincingly show how effective a projected measure might be, regardless of whether a new road is going to be constructed or a new tram line is being planned. VISSIM therefore offers the unique opportunity to integrate citizens into the decision-making process.
