The National Strength and Conditioning Association's NSCA ...

There wasn't any special training that allowed them to lift heavy weights with relatively little mass; most of it simply has to do with how they're built. So, the primary goal of intermediate training is to get into the highest weight class possible, as fast as possible, while still being fairly lean (below 15% body fat for men, and below 25% for women) and protecting the joints as much as ...
