Speaker configurations. Quality sound is hugely important for the cinema experience, and a surround sound system in your home theater can help you connect more deeply with the characters of your favorite shows and the best movies. A good 5.1-channel system will give you a full surround sound experience. Most DVD and Blu-ray™ media, some Super Audio CDs (SACDs), broadcast TV, and many streaming sources are in 5.1-channel format.

Speaker Setup Guide—Dolby

7.1 Surround Sound. A 7.1 surround sound system has the same basic setup as the 5.1, but also includes right and left back speakers positioned behind the viewer. This configuration means you're getting a total of four surround zones, further enhancing the spatial dimension and audio definition for movie soundtracks.

Step Up Solution – 5.1 Speaker Surround The traditional surround sound setup that involves separate speakers is a 5.1 setup. The 5 means three speakers in the front of the room – left, center and right channels – and two surround speakers in the back of the room.

Surround Sound: A Beginner's Guide—A V-Enthusiast

The left and right speakers provide more lateral, but still highly localized and directed, sound. If possible, the left and right speakers in a surround sound system should be full-range speakers. For the best results, try to position the left and right front speakers so that the tweeters are at ear level.

How to Set Up a Surround Sound Speaker System—dummies

Surround Left & Right Speakers (SL & SR): Place the SL & SR speakers between 90° to 110° directly to the sides of your seating position. The left and right surrounds speakers should be mounted two feet or higher above the listener to maximize ambience. Surround Back Left & Right Speakers (SBL & SBR): Used in a 7 speaker configuration. Mount the back left and right surround sound speakers behind the seating position at ear level in line with the front speakers.

5.1 & 7.1 Surround Sound Speaker System Setup & Placement—

Surround Sound Setup Guide for NUC. This guide will show the recommend method to setup surround sound through bitstreaming. Bitstreaming is the process whereby the NUC sends an un-encoded digital signal to an A/V receiver, to which the receiver will decode the signal, not the NUC, and often produces better quality sound, depending on the receiver. What is Needed:

Surround Sound Setup Guide for NUC—Intel

Also, go into the sound settings and turn on surround sound. This will send Dolby (mono) Surround audio to your receiver that can be decoded into a pseudo 5.1 experience using Pro Logic II DSP. AV Receiver: The AV Receiver is the heart of your system. Each receiver will have a varying level of control, and some seem to have endless pages of customization while others only have a few basic settings.

Basic Home Theater AV Set-Up Guide—Hooking It All Up—

How to set up your system. To create an optimal sound system enabled with Dolby Atmos®, first familiarize yourself with the role and position of each speaker. Then choose a central seating point and angle your speakers at it, keeping them at your ear height when you are seated, unless noted otherwise.

With the speakers selected, click on Set Default and then hit the Configure button. In the Speaker Setup window, select 5.1 Surround and hit Next. If you see multiple 5.1 Surround entries, select the one that resembles more closely how have placed your speakers. Note: Ignore the Test button for now.

How to Configure and Test 5.1 Surround Sound on Windows 10—

Height Speaker Channels. The height speaker channels should be placed in the upper left/right corners of the front stage. Typically, this will be 40-45 degrees off-axis and about 8 feet in height. A downward tilt of the speaker will improve mid/high frequency response and reduce ceiling bounce reflections.

The Art of Speaker Placement—SVS

A setup with a home theater speaker, subwoofer, and two rear surround speakers is called 5.1. Without the subwoofer it's called 5.0. Once you've set up your home theater, it's easy to make sure it sounds its best in your unique space by fine-tuning it with Trueplay™. It's also easy to add additional speakers in other rooms of the house.

The Ultimate Guide to a Sonos Home Theater—Sonos—

Broadly speaking, we can consider 'Surround Sound' any sound system that provides more than the regular stereo pair. The whole point of Surround Sound is to literally surround you with sound, so the extra speakers get placed behind, in front, to the sides, up and down, etc, all to make it sound like bullets, dinosaurs, whatever, are flying around you from all sides.
