A PDF version of this book is available for free in open access via www.tandfebooks.com as well as the OAPEN Library platform, www.oapen.org. It has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license and is part of the OAPEN-UK research project. This book traces the history and development of a mutual organization in the financial sector called SWIFT, the Society for Worldwide Interbank Financial Telecommunication. Over the last forty years, SWIFT has served the financial services sector as proprietary communications platform, provider of products and services, standards developer, and conference organizer ("Sibos"). Founded to create efficiencies by replacing telegram and telex (or [wires]) for international payments, SWIFT now forms a core part of the financial services infrastructure. It is widely regarded as the most secure trusted third party network in the world serving 212 countries and over 10,000 banking organizations, securities institutions and corporate customers. Through every phase of its development, SWIFT has maintained the status of industry cooperative thus presenting an opportunity to study broader themes of globalization and governance in the financial services sector. In this book the authors focus on how the design and current state of SWIFT was influenced by its historical origins, presenting a comprehensive account in a succinct form which provides an informative guide to the history, structure, activities and future challenges of this key international organization. This work will be of great interest to students and scholars in a wide range of fields including IPE, comparative political economy, international economics, business studies and business history.

Letters of Credit: Theory and Practice explains in simple English all the important information you'll ever need on letters of credit (LC). This book provides extensive, easy-to-understand, practical and useful suggestions to help during negotiations, in selecting the right terms of payment, improving operations, reducing errors and risks, facilitating trade and final settlement, and much more. It is extensively researched, delving deep into the subject of international trade, presenting current issues and solutions related to LCs that the reader may not otherwise come across easily. A gold mine of information on payment risk management, it's the last word on documentary credits. [This book is a great read for knowledge and practical information on letters of credit. It succinctly takes the reader through the concepts of risk management, explains the fundamentals of global trade finance issues, the dilemmas plaguing international sellers and buyers, and standardised ways for the buyer and the seller to secure goods and make payments, respectively. This is a must-read book for academicians, exporters, importers and bankers looking for complete, authentic information on international trade finance and global business.] - Dr. Deepankar Sinha, Professor; Head - Research Division, Kolkata Campus; Programme Director - Centre for Trade and Logistics (CFTL), Kolkata Campus, Indian Institute of Foreign Trade (IIFT)

If you think that the rules of the International Chamber of Commerce (ICC), Paris on trade finance and documentary credits have no surprises left for you, then read this book very carefully from cover to cover. Whether you are a trade finance veteran or a recent entrant, the articles in this book will provide you with a few unconventional and unusual perspectives about the UCP and the ISBP rules. The book discusses selected provisions of UCP 600, and also raises several pertinent questions. For example, does the SWIFT MT700 really provide for an expiry date? Is article 15 necessary? Why shouldn't UCP sub-article 16(f) apply to a nominated bank? Did you know that UCP article 10 on amendments has a huge logical error? Why are some critical rules missing in the UCP (they are only in the ISBP)? Are you aware that sub-articles 14(g), and 14(h) on non-documentary conditions, are both incorrectly structured? Which ICC [rules] apply if a presentation contains only copies of transport documents? Must a B/L or a MMTD show a date of issue? What is [negotiation]? Why is the place where a credit is available of critical importance to an exporter/beneficiary? Go ahead and read the book. It will provide you with plenty of food for thought, a deeper understanding of the rules of trade finance, and value for money.

Being able to make and receive payments is an essential facet of modern life. It is integral to the banking and finance systems, and it touches all global citizens. In some areas, payment systems are rapidly evolving \ moving swiftly from paper payment instruments, to electronic, to real-time \ but in others, underdeveloped payment systems hold back economic and social development. This book is intended to assist the reader in navigating the payments landscape. The author explores highly topical areas, such as the role of payment systems in enabling commerce to contribute to the development of emerging economies, the evolution of payment systems from paper instruments to computerization, the role of cryptocurrencies, and the slow decline of plastic credit and debit cards owing to alternative forms of payment being introduced. Altogether, this book provides a comprehensive overview of the evolution of payment and offers projections for the future, encouraging readers to explore their own predictions, using the framework that the book has provided. It is vital reading for technologists, marketers, executives and investors in the FinTech sector, as well as academics teaching business and technology courses.

Provides a clear understanding of the law governing electronic funds transfers, with emphasis on global and domestic wire transfers, ACH payments and consumer transactions. Concise analysis of U.C.C. Article 4A, EFTA, Regulation E and other pertinent law gives you the information you need to understand the complex legal ramifications of electronic funds transfers. Details the law on such topics as: \ Acceptance, rejection, and execution \ Sender's payment obligation to accepting bank \ Liability for unauthorized payment orders \ Errors in payment orders and acceptance \ Cancellations, amendment, and reversal \ Damages for improper execution \ Beneficiary's rights: notice, payment, and discharge First published in 1992.

This book addresses key topics relating to international trade; letters of credit mechanism, collections of bills, trade customs and practice. Dealing with complicated implementation issues in a forthright and comprehensive fashion, it is an essential tool for navigating the procedures of international trade finance.

Giving IT professionals in financial services firms a rounded and comprehensive grounding in their knowledge of their industry, this book offers a primer on the major financial instruments, transactions, and processes, as well as a sound knowledge of the principles of good IT management in the industry. The book gives readers a clear understanding of equities, bonds, currencies, listed derivatives and OTC derivatives. It explains transactions in those instruments and the requirements of business systems that process these transactions. Transactions covered include (inter-alia) agency and principal purchases and sales, loans and deposits, repos and reverse repos, stock loans; and also the Sharia-compliant 'Islamic' transactions that may be used as alternatives to interest bearing transactions. Andrew Bradford gives an introduction to how investment firms are regulated; offers an understanding of the STP (Straight-through-Processing) concept following the trade cycle for the transactions from order through to execution through pre-settlement to final settlement; covers basic accounting procedures for the transactions; and conveys the basic principles of good IT management in the investment industry.

As economic and regulatory pressures drive financial institutions to seek efficiency gains by improving the quality of their trading processes and systems, firms are devoting increasing amounts of capital to maintaining their competitive edge. Straight-Through Processing (STP), which automates every step in the trading system, is the most effective way for firms to remain competitive. According to the Securities Industry Association, the US securities industry will spend \$8 billion to implement STP initiatives, and 99% percent of this investment will be made in systems internal to the firm. Straight-Through Processing for Financial Services: The Complete Guide provides the knowledge and tools required by operations managers and systems architects to develop and implement STP processing systems that streamline business processes to maintain competitiveness in the market. * Learn the tools and techniques for developing software systems and for streamlining business processes * Keep up to date and well informed in this highly regulated and ever changing market * Gain the knowledge and experience for a leading consultant in the field
