with practical advice and easy-to-follow instructions. Dr. Vasant Lad, a leading authority in this field, has created an invaluable guide to treating common ailments and chronic problems with strategies tailored to your personal needs based on your dosha. Dr. Lad first explains the principles behind the science of Ayurveda, exploring the physical and psychological characteristics of each of the three doshas, or mind-body types--vata, pitta, and kapha. Once you have determined which type or combination of types you are, Dr. Lad helps you to begin your journey to the ultimate "state of balance" and well-being. Dr. Lad explains why certain imbalances often result in illness and shows you how to restore your body to natural order. You'll learn which traditional Ayurvedic remedies--herbal teas and formulas, essential oils, meditation, yoga--offer relief from a variety of conditions, such as cold and flu symptoms, headaches, toothaches, sore throats, high cholesterol, vision problems, anxiety, and depression. Dr. Lad also shows you how to use diet and specific Ayurvedic techniques to prevent future illness and to promote body consciousness and healthy living. The Complete Book of Ayurvedic Home Remedies enables us all to experience the benefits of Ayurveda's healing properties that have been refined over thousands of years. All of the herbs, foods, and oils Dr. Lad recommends can be found in local health food stores or through mail-order catalogs. Complete with an extensive glossary and resource list, this is the definitive guide to natural, safe, and effective remedies, everyday keys to a lifetime of vitality and well-being.

“Aged? But he does not appear aged, just look, his hair has remained young!” Marcel Proust, *In Search of Lost Time* (1913–27) The appearance of hair plays an important role in peoples’ overall physical appearance and self-perception. With today’s increasing life-expectation, the desire to look youthful plays a bigger role than ever. The hair care industry has become aware of this, and capable to deliver active products that are directed toward meeting this consumer demand. The discovery of pharmacological targets and the development of safe and effective drugs such as minoxidil and finasteride also indicate strategies of the drug industry for maintenance of healthy and beautiful hair in the young and old. The study of hair aging focuses on two main streams of interest: On the one hand, the esthetic problem of aging hair and its management, in other words everything that happens outside the skin; on the other hand, the biological problem of aging hair, in terms of microscopic, biochemical, and molecular changes, in other words the “secret life” of the hair follicle in the depth of the skin. Hair aging comprises hair shaft aging, and aging of the hair follicle. The former involves weathering and photoaging of the hair shaft, while the latter manifests as decrease of melanocyte function (graying) and decrease in hair production (alopecia).

The culmination of 4 years of research and personal experience with female thinning hair. Hair loss in varying degrees affects millions of women the world over. Yet this is a subject almost never discussed. Bambi Staveley, hair loss writer and former nurse who has herself been a hair loss sufferer, has spent many years researching the many causes and solutions. For many women thin or thinning hair creeps up as part of the aging process. Wrinkles and aching joints are all common, if not unwanted, outcomes of the aging process, but not the loss of our once gorgeous, thick crowning glory. For the vast majority of
