The Thematic Apperception Test, or TAT, is a type of projective test that involves describing ambiguous scenes. Popularly known as the "picture interpretation technique," it was developed by American psychologists Henry A. Murray and Christina D. Morgan at Harvard University in the 1930s.

**What Is the Thematic Apperception Test (TAT)?**

Thematic apperception test is a projective psychological test developed during the 1930s by Henry A. Murray and Christiana D. Morgan at Harvard University. Proponents of the technique assert that subjects' responses, in the narratives they make up about ambiguous pictures of people, reveal their underlying motives, concerns, and the way they see the social world. Historically, the test has been among the most widely researched, taught, and used of such techniques.

**Thematic apperception test - Wikipedia**  
Thematic Apperception Test The most widely known and used story telling technique is the TAT. It was developed by Morgan and Murray (1935) in the belief that the content of imagined stories would provide clues to the underlying dynamics of a subject's interpersonal relationships and self-attitudes.
