Once the balloon is filled with hot air, it should rise a little and slowly drift back down to the ground. The hot air balloon you built out of tissue paper works under the same scientific principle that enables real hot air balloons to fly: warmer air rises in cooler air.

~~...~~

A retail hot air balloon made of paper has a dimension of 15" x 22.8" x 40.6". This is probably the minimum size to make a hot air balloon. There needs to be sufficient air space to be able to lift the weight of the materials used. Going any smaller will most likely not fly unless you are filling the air space with a lighter-than-air gas.

Paper | Zazzle.co.uk~~

Hot Air Balloon Construction
We started with rolls of
tissue paper 24 inches wide
for that one. We cut off 8
pieces, each 6 feet long.
You can also glue 2 or 3
pieces of regular tissue
paper together to make the 8
long pieces you will need.

~~Hot Air Balloon Construction
— Mountain Telephone~~

The principle of hot air
rising will be harnessed to

Online Library Tissue Paper Hot Air Balloon Template

create a tissue paper hot air balloon. The molecules within hot air are moving faster than the molecules within cold air. These after moving hot air particles have more kinetic energy and are thus spaced further apart. This causes hot air to be less dense than cold air.

~~Eighth grade Lesson Hot Air Balloon Challenge +
BetterLesson~~

By using large sheets of tissue paper and a template, a simple hot air balloon can be constructed. The balloon will then rise if the air inside is heated using a hair dryer. Children can

Online Library Tissue Paper Hot Air Balloon Template

work in groups to make a large balloon if the template is scaled up.
