Disconnected, dirty or fouled spark plugs are common causes for engines that won't start. For small engines, spark plugs typically need to be replaced every season or after 25 hours of use. You should also check to make sure the spark plug gap is set correctly. An improper spark plug gap could lead to engine knocking and poor performance.

~~BRIGGS AND STRATTON LAWN MOWER ENGINE REPAIR - HOW TO ...~~

Proper cleaning and maintenance will keep your Briggs and Stratton carburetor working well. A carburetor mixes fuel with air and sends that mixture into an engine to be ignited by a spark plug which drives the piston and produces the power output in an internal combustion engine. Problems with the carburetor can manifest in many ways including the engine not starting, idling low, idling high, sputtering, dying, and producing black smoke exhaust.
