Unit 20 | Ryan Bibby  
Client side scripts rely on the users computer. If that computer is slow then it may run slowly.

# Read Book Unit

## 20 Client Side

They may not run at all if the browser does not understand the scripting language, this is one reason why it is important to have recent browsers because they have to run on the users system and the code, which makes up the script is there is the HTML for the user to look at.
