The Vicon 'acrobat' hay rake was a regular sight at haymaking time throughout the late 1970s and was a development of the original design. The large rotating finger wheels moving the cut grass into rows. These machines could do a very good job but did require setting up correctly to get the best out of them.

Interesting that you mention the mounted Vicon acrobat and the travelling position - I remember from my youth in the early 70s, there was only one farm worker locally who knew how (or bothered) to stack the 'wheels' vertically for travelling (which actually made the thing really neat and easy to transport). All the others would just heft the thing down the lanes with the outer-most 'wheels' ...
