Be wary of the people no one wants on their team, the ones who are too small, too slow and not very capable. The unwanted have a built-in motivation to do whatever it takes to succeed that those who were picked first do not have. This is the story of such a person and what he did to find his place at the top of the world in his sport.

WINNER OF THE TELEGRAPH SPORTS BOOK AWARDS 2020 – GENERAL OUTSTANDING SPORTS WRITING 'A fascinating book about the psychology of elite sport... Mind Games explores compelling territory.' Don McRae, the Guardian 'An amazing book that I very much enjoyed.' Simon Mundie, Don't Tell Me the Score (BBC Podcast) 'a fascinating book' Daily Mail It's well known that to reach the top in elite sport, you need to have spent years honing and perfecting your physical ability. However this is only part of the template required to win – the other half is about mind games. Throughout her career as one of the world's top athletes, Annie Vernon struggled with existential questions about the purpose of sport in our comfortable, first-world society: Why do we do it? What is it in our psyche that makes us push ourselves to the limit? What allows us to mentally overcome the physical pain? Now retired from competition, Olympic silver medallist and world champion rower Annie Vernon has decided to look for answers to these questions. Drawing on her personal experiences and interviews with some of the best coaches, athletes and psychologists from across the world of sport – including Lucy Gossage, Katherine Grainger, Matthew Pinsent, Brian Moore, Brian Ching and Dr Steve Peters – Annie discovers the secrets of how athletes train their brains in order to become world beaters. Annie debunks the myth that elite performers are universally cool, calm and brimming with self-assurance. Through exploring the bits on the inside that nobody can see, Annie instead creates a new understanding of what it takes to be successful in sport and uncovers that, in fact, an elite athlete is not that different from you and me. It's simply a question of mind games.

As every sports person knows, it's the winning that counts. But in any sporting contest there are actually two separate battles to be won - physical and mental. No athletes would dream of entering a competition in less than peak physical condition, but they are rarely mentally prepared to the same extent. Lack of mental discipline leads to loss of concentration, injury and defeat as much a lack of fitness.

There are many guides available that focus on dealing with stress, but virtually all the advice concentrates on responding to the results and symptoms of stress, rather than its causes. No wonder everyone continues to suffer from the devastating consequences of being stressed out. Author Manuel Antonio Lopez, a professional mechanical engineer, seeks to fill this void in knowledge by sharing stress alleviators that he has discovered over a lifetime. In this practical guidebook to understanding the causes of stress-related hair loss and illness, you can discover how to reverse harmful effects. Lopez looks back on his own battles with stress and how he went from being hyperactive and stressed out to relaxed and carefree. As a result of dealing with his stress, he went from being balding and overweight to being trim and sporting a head of thick, lustrous hair. Get a better night 's sleep, prevent depression, keep your hair, and, most importantly, boost your chances of living a long and healthy life with A Guide to Winning Mind Games.
