A Zeppelin airship takes its name from German Count Ferdinand von Zeppelin -- a German General and inventor whose company -- Luftschiffbau Zeppelin (LZ)--led the development of the rigid flying machines in the late 1800' s / early 1900' s. After the great success of Zeppelin's design, the word "zeppelin" became used to refer to all rigid airships.

THE JEWISH WAR ON GERMAN AIRSHIPS - The Real History Channel
Luftschiffbau Zeppelin GmbH is a German aircraft manufacturing company. It is perhaps best known for its leading role in the design and manufacture of rigid airships, commonly referred to as Zeppelins due to the company's prominence. The name 'Luftschiffbau' is a German word meaning building of airships. The company was founded by Count Ferdinand von Zeppelin in 1908 as a formal entity to continue advancing his pioneering research into rigid airships. Luftschiffbau Zeppelin became the leading ma

Luftschiffbau Zeppelin - Wikipedia
The Zeppelin NT is a 246-foot long semi-rigid airship which can accommodate two pilots and up to 12 passengers in a gondola equipped with large sightseeing windows. The airship is inflated with safe, non-flammable helium and usually cruises at an altitude of about 1,000 feet/300 meters, at a speed of approximately 35-40 mph, or 60-70 km/h.

Zeppelin Rides in Germany | Airships.net
LZ 127 Graf Zeppelin was a German passenger-carrying, hydrogen-filled rigid airship which flew from 1928 to 1937. It was designed and built to show that intercontinental airship travel was practicable. Its operational history included several long flights, such as a polar exploration mission, a round-the-world trip, trips to the Middle East and the Americas (operating five years of regular ...

The first Zeppelin airship was designed by Ferdinand, Graf von Zeppelin, a retired German army officer, and made its initial flight from a floating hangar on Lake Constance, near Friedrichshafen, Germany, on July 2, 1900.

zeppelin | Definition, History, Hindenburg, & Facts ...
Count Ferdinand von Zeppelin began construction of his first airship, LZ-1, in June, 1898 in a floating wooden hangar on the Bodensee (Lake Constance) at Manzell (Friedrichshafen) in Southern Germany, not far from the Swiss border. The movable, floating shed allowed the ship to be positioned into the wind to enter or leave its hangar.

The First Zeppelins: LZ-1 through LZ-4 | Airships.net
In the early 20th century, the Zeppelin airship inspired a unique sense of awe. These phenomenal rigid, lighter-than-air craft - the invention of Ferdinand Graf von Zeppelin (1838-1917) - approached the size of a small village. Although they moved slowly, there was no mistaking their exciting - or ominous - potential.
